A screenshot of the MolPrime mobile app interface. The app title 'MolPrime' is at the top left, and a plus sign is at the top right. Below the title are six chemical structures arranged in a 2x3 grid. The first row contains caffeine, aspirin, and sildenafil. The second row contains cholesterol, iron(II) tetraphenyl porphyrin, and trisbipyridine ruthenium(II). Each structure is labeled with its name below it.

A screenshot of the MolPrime mobile app interface, showing a search bar and social media icons. The app title 'MolPrime' is at the top left. Below the title are three chemical structures: caffeine, aspirin, and sildenafil. Below these structures is a search bar with the text 'name|'. To the right of the search bar are icons for a magnifying glass, a person, a mail envelope, a globe, a checkmark, a share icon, a website icon, and a Twitter icon. Below the search bar and icons are three chemical structures: cholesterol, iron(II) tetraphenyl porphyrin, and trisbipyridine ruthenium(II). Each structure is labeled with its name below it.

A large green logo with the text 'БЕЗ ГМО' in white. The 'О' is replaced by a white leaf icon. The logo is set against a green background.

$$a = \frac{F}{m}$$

$$(a + b)^n = a^n + C_n^1 a^{n-1} b + C_n^2 a^{n-2} b^2 + \dots + C_n^k a^{n-k} b^k + \dots + C_n^{n-1} a b^{n-1} + b^n$$

$C_n^k$  - биномиальные коэффициенты.
