

MEDIA SPACE-MEDIA EDUCATION-NEW UNIVERSES

Performed: 2nd year student of the
faculty «Media education»
Sycheva, Tatyana

MEDIA SPACE

- Media is an extensive concept and a key term of the Toronto school of communication theory, which includes means of communication, methods of information transmission, as well as the environment formed by them (media space).

DANGER AND PROTECTION

- It is very important that information transmission systems are as safe as possible for humans.

INFORMATION IS VERY DIFFICULT TO CONTROL

- It is necessary to have skills of perception of information.
- It is necessary to be able to filter out and filter the necessary but safe information in the General flow.

- Children's consciousness is very flexible and sensitive to the manifestations of the outside world. Information is sharp, rough and painful.

CAN NOT COPE

- Aggressive information space can captivate an adult. An adult may not recognize harmful information.

TROPICAL STREAMS OF INFORMATION

As the flow of mud during a tropical rain destroys everything in its path. So information can cripple the child's psyche if its flow is not correctly directed.

TEACH YOUR CHILD TO FISH AND HE WILL ALWAYS BE FULL

Media education task is to create a responsive learning environment for children w

Children need to show the first steps, then they will go further on their own!

ENVIRONMENT, AIR, ATMOSPHERE

An adult, a parent, a teacher should create an atmosphere in which children will naturally understand and develop

NEW UNIVERSES OF KNOWLEDGE

It is important to teach your child to dream the right Universe and create it! And that this universe could live long and fruitfully, it is necessary to build a strong protective field for the exchange

"DOCTORS: HEAL YOURSELF!" HIPPOCRATES

For a successful business requires the
creation and adaptation of adults
themselves and as soon as possible!
