

LED Pole Lights

Making the Outdoors
Safer for You

When it comes to making the premises safe and sound for the employees and the facility owners, LED pole lights are the best option. Whether safeguarding from the potholes or dark spots, the employees need clear workplace and parking lots.

Ensuring safety for the workplace, **LED pole lights** provide a clear opportunity for the employees and business owners to increase productivity and work efficiency. The LED pole lights come with a higher lifespan and can illuminate a general area.

Key considerations

- **Power** : The more comprehensive the area, the more wattage is required for the **LED pole lights**.
- **Sensors** : Dimming sensors are a must for LED pole lights as the lights can be switched off automatically or dimmed by 30% when there is no traffic inside the premises.
- **Lifespan** : The life expectancy of LED pole lights is more than **50,000 hours** of continuous operation.

Advantages

- Eco-friendly (No harmful chemicals like mercury, lead, etc.)
- The color temperature ranges up to 5700K for better visibility.

- UL and DLC approvals.
- Easy to Install and withstand severe climatic conditions.
- 5-years of manufacturer's warranty.
