

**THE 11<sup>th</sup> of MARCH**

**THURSDAY**

# Тема урока:

- Мир, в котором жили предки англичан и наглядное представление о соотношении величин.

- проработать с текстом, уметь выделить главное, ответить на вопросы;
- закрепить навыки работы с электронными таблицами: вспомнить как строятся диаграммы по табличным данным.

## The words:

- Angles Cedric
- Saxons Cart
- Pagan
- Priest
- Artos
- Arthur

## Answer the questions:

- Where did Artos and his family live?
- Why did his father look worried?
- Who were the enemies of Artos and his tribe?
- What was Artos' tribe going to do?
- Why did Artos hate the Angles and Saxons?
- What happened at night?

## True or False.

The Romans had to leave the British Isles.

The Angels and Saxons were Germanic tribes.

The Celts and the Angels, Saxons were friends.

The Celts had to leave their land.

The Celts were pagan.

The Angels and Saxons were Christians.

The word “Anglia” means “the land of the Angels”.

**What do the words:**  
**Fight for the ring. Fight**  
**with the ring. Fight in**  
**the ring mean?**

- The main treasure of the tribe is the ring. People know that the ring is magic. The ring always helps the tribe and people are ready to fight for the ring.
- People of the tribe must always be together ( in the ring) and are ready to fight for their friends.(+)

Почему Артос, произнося слова *We are the people of the Ring. Together we are free and strong like Arthur's knights at the Round Table* сравнивает кольцо пламени с круглым столом короля Артура?

- Because Arthur's Round Table was magic and the ring is magic.
- Because the ring is round and the table is round. If you sit in the ring, everybody is equal. Nobody is better or worse

## Who said these words:

- Fight for the ring! Fight with the ring! Fight in the ring!
- We are the people of the ring. Together we are free and strong like Arthur's knights of the Round Table.

# Практическая работа:

- Посчитайте, пожалуйста, у себя в тексте, сколько реплик отца и сына.
- Откройте программу MS Excel: в поле в ячейках A1 и A2 запишите слова **отец** и **сын** на английском языке, а в ячейках B1 и B2 соответствующее количество реплик.
- На основе этих данных постройте диаграмму, наглядно показывающую соотношение величин.
