

Presentation on the lesson of the
English language
on the topic
Chatyr tau

This is the highest point of Tatarstan - 350 meters above sea level.
It is located seven kilometers from the city of Aznakaevo.

The name of the mountain is Chatyr-Tau (translated from Tatar as Shater Mountain)

Coincides with the appearance - a huge green tent.

At the foot of the Shater Mountain, the river Styarle flows, adding life to a beautiful mountain landscape.

The mountain offers a panoramic view of the surroundings, hilly terrain and forests.

Twenty kilometers from the mountain, beyond the river Ik is Bashkortostan, villages and villages which can also be clearly seen.

The Shater-Mountain and its environs area is one hundred and thirty hectares.

From the year 1972 is a natural monument, and from the year 1999 the state nature reserve.

On the territory there is a large colony of rare animals, as well as rare plant species, listed in the Red Book.

In the 18th century, on the western slope of the Shater Mountain, copper mining was conducted, and today one can see multiple craters and galleries.

The beauty and functionality of the Tatar mountain in the year 1773 was described by the naturalist and geographer P.S. Pallas.

Mount Chatyr-tau with its surroundings is popular with local hang-gliders and paragliders.

For tourists, there is a walk uphill on horseback.

A scenic landscape featuring rolling hills and a field. The foreground is a lush green field with some yellow wildflowers. In the middle ground, there are rolling hills with patches of green grass and clusters of trees. The background shows more hills under a bright blue sky with scattered white clouds. The text "Welcome to Tatarstan on the mountain Chatyr tau." is overlaid in red.

**Welcome to Tatarstan on the
mountain Chatyr tau.**

Thank you for attention.
