

$8 + 5 =$

$12 - 8 =$

$6 + 9 =$

$17 - 9 =$

$$8 + 5 = 8 + 2 + 3 = 13$$

A diagram illustrating the decomposition of the number 5. Two arrows originate from the number 5 in the equation above and point to two separate brown boxes. The first box contains the number 2, and the second box contains the number 3.

$$2 \quad 3$$

A diagram illustrating the decomposition of the number 10. Two arrows originate from the number 10 in the equation above and point to a single brown box containing the number 10.

$$10$$

$8 + 5 = 13$

$12 - 8 =$

$6 + 9 =$

$17 - 9 =$

$$9 + 6 = 9 + 1 + 5 = 15$$

A diagram illustrating the decomposition of the number 6. Two arrows point from the '6' in the equation above to two separate brown boxes. The first box contains the number '1' and the second box contains the number '5'.

$$1 \quad 5$$

A diagram illustrating the decomposition of the number 9. Two arrows point from the '9' in the equation above to a single brown box containing the number '10'.

$$10$$

$8 + 5 = 13$

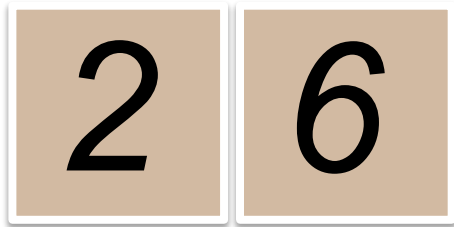

$12 - 8 =$

$6 + 9 = 15$

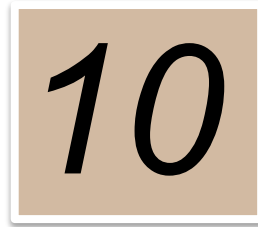

$17 - 9 =$

$$12 - 8 = 12 - 2 - 6 = 4$$

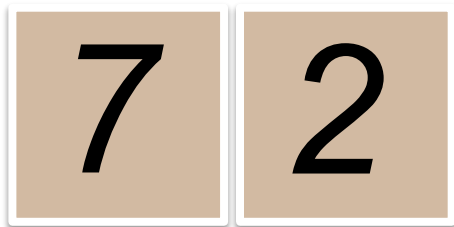

2 6

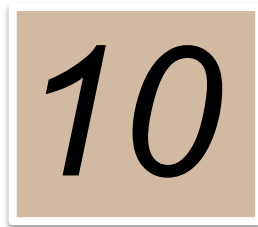

10

$$17 - 9 = 17 - 7 - 2 = 8$$

7 2

10

«Радуга»

$$8 + 2 + 5$$

и реши пример.

8	+	7	=	15			
---	---	---	---	----	--	--	--

$9 + 1 + 8$

$17 - 7 - 2$

$7 - 9 = 8$

$9 + 9 = 18$

$16 - 6 - 2$ 

и задачу на вычитание.

$$16 - 8 = 8$$

$11 - 1 - 1$ 

На  
СКОЛЬКО  
тяжелее  
?

$$11 - 2 = 9$$
