Логические операции:

1. **AND** (простой пробел) - позволяет искать в статьях сразу оба элемента запроса
2. **OR** - позволяет искать статьи, где упоминаются сразу либо сразу оба элемента запроса, либо только один из элементов
3. **NOT** - позволяет искать статьи, где не упоминается один из элементов запроса
4. **()** - позволяет отделить компоненты запроса друг от друга
5. **“ ”** - позволяет искать конкретное словосочетание
6. ***** - позволяет найти все слова с заданной основой

Что же мы нашли?

Иерархия доказательной способности:

Что же мы нашли?

Уровень доказательности	Тип исследований
I (A)	Доказательства получены в результате мета-анализа большого числа хорошо спланированных рандомизированных исследований.
II (B)	Доказательства основаны на результатах не менее одного хорошо спланированного рандомизированного исследования.
III (C)	Контролируемые исследования с одной группой больных, исследования с группой исторического контроля и т.д.
IV (D)	Описательно корреляционные исследования и исследования клинических случаев.

Zotero

The screenshot shows the Zotero desktop application. The main window is divided into several sections:

- Left Panel (Library List):** A tree view showing the user's library structure. The "Моя библиотека" (My Library) folder is expanded, showing sub-folders like "АРМ: вестибулярные свищи" and "Мои публикации". A list of bibliographic entries is displayed below. The entry "Rectovestibular fistula with normal anus: a treatment alternative" is selected and highlighted in blue. A red circle highlights the entire left panel.
- Top Bar:** Contains menu items like "Правка" (Edit) and "Инструменты" (Tools), and a search bar.
- Main Table:** A table with columns "Название" (Title) and "Создатель" (Author). The selected entry's details are visible in this table.
- Right Panel (Information):** A detailed view of the selected entry. It includes fields for "Тип документа" (Document Type), "Название" (Title), "Автор" (Author), "Выдержка" (Snippet), "Публикация" (Publication), "Том" (Volume), "Выпуск" (Issue), "Страницы" (Pages), "Дата" (Date), "Серия" (Series), "Название серии" (Series Title), "Текст серии" (Series Text), "Журнал сокращ." (Journal Abbreviation), "Язык" (Language), "ЦИО/DOI" (Cite/DOI), "ISSN", and "Краткое назв." (Short Name). A red circle highlights the entire right panel.

Below the main window, a secondary list of search terms is visible, including "Аноректальная Манометрия" and "Аноректальная Патология".

Format: Abstract

Nihon Shokakibyō Gakkai Zasshi. 2018;115(1):108-116. doi: 10.11405/nisshoshi.115.108.

[D] ur [Art] Kur [+] /

Ab: Ret
analyzed the clinical characteristics, diagnosis, treatment, and prognosis of six male patients with anorectal lesions caused by Crohn's disease. Three patients were treated with abdominoperineal resection and the other three with rectal excision without anastomosis. Excluding one case, which presented worsening immediately after surgery, symptoms of urethral fistula improved without urethral stenosis, dysuria, or sexual dysfunction. Recto-perineal-urethral fistula is currently treated with various treatment modalities, including colostomy and drug therapy. Although the evaluation of these modalities is required, abdominoperineal resection or rectal excision without anastomosis may be a valuable treatment option because these approaches improve the urethral fistula while sparing the urethra without any significant complications.
