# GOVERNMENT INCENTIVES AND LEGISLATION

## INDUSTRIAL DEVELOPMENT

- Russian Government have approved in February 2021 updated Strategy for the wood processing industry development up to 2030 (cluster approach, further processing, pulp and paper production development, intensive reforestation) targeting:
  - Double the share of forest based industries in GDP
  - Annual harvesting 286 mln m<sup>3</sup>
  - Sawn timber domestic consumption 24 million m<sup>3</sup> and 43 million m<sup>3</sup> exports
- Resolution #1509 from 21.09.2020 legalized logging at abandoned agricultural lands (about 100 million hectares across Russia, primarily in NW regions)
- Resolution #496 from 18.09.2019 offers federal subsidies for the forestry based industries to cover partly logistic costs for exports

## CONTROLLING FUNCTIONS

- Federal Law No. 3-FZ of February 4, 2021 «On Amendments to the Forest Code of the Russian Federation and Certain Legislative Acts of the Russian Federation in Terms of Improving the Legal Regulation of Forest Relations» (full enforcement from July 01, 2021)
  - Total tracking of round wood and sawn goods for timber supply chain including stocks in the logging area
  - Digitalization of all documents for timber turnover in Unified State Information System
  - Registration of all transactions with timber including commercial contracts with pricing
  - Assignment of harvesters to dedicated cutting areas and satellite tracking of all transportation vehicles in logging areas

## RECENT INITIATIVES

- **Development of the new regulations to set additional export duties for green lumber (more than 22% moisture content) including changes in HS codes and Customs duties. Planned to be enforced starting 2022**
- **Package of new initiatives (customs regulations, border crossing points, railway tariffs) to enable further limitations on round wood exports targeting softwood and hardwood saw log exports from Siberia and Far East regions. Planned to be enforced starting 2022**

# CONCLUSIONS

- China remains the key market for Russian sawmills in all major lumber production regions. «One Belt One Road» strategic initiative will give more opportunities for Russian exporters
- Russian saw milling industry achieved maximal historic export volumes in 2019. The availability of saw log became a major limiting factor for further growth in production capacity utilization
- Russian State in past 10 years has successfully promoted investments in saw milling and is taking next steps to stop saw log exports completely in order to increase share of further processing
- Recent Government incentives will drive modernization projects at existing sawmills. The share of kiln dried sawn goods in Russian exports will increase as well as further processed timber in the domestic market

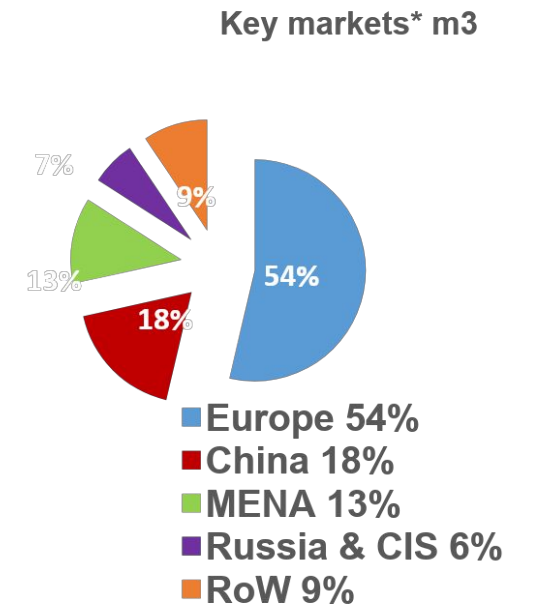

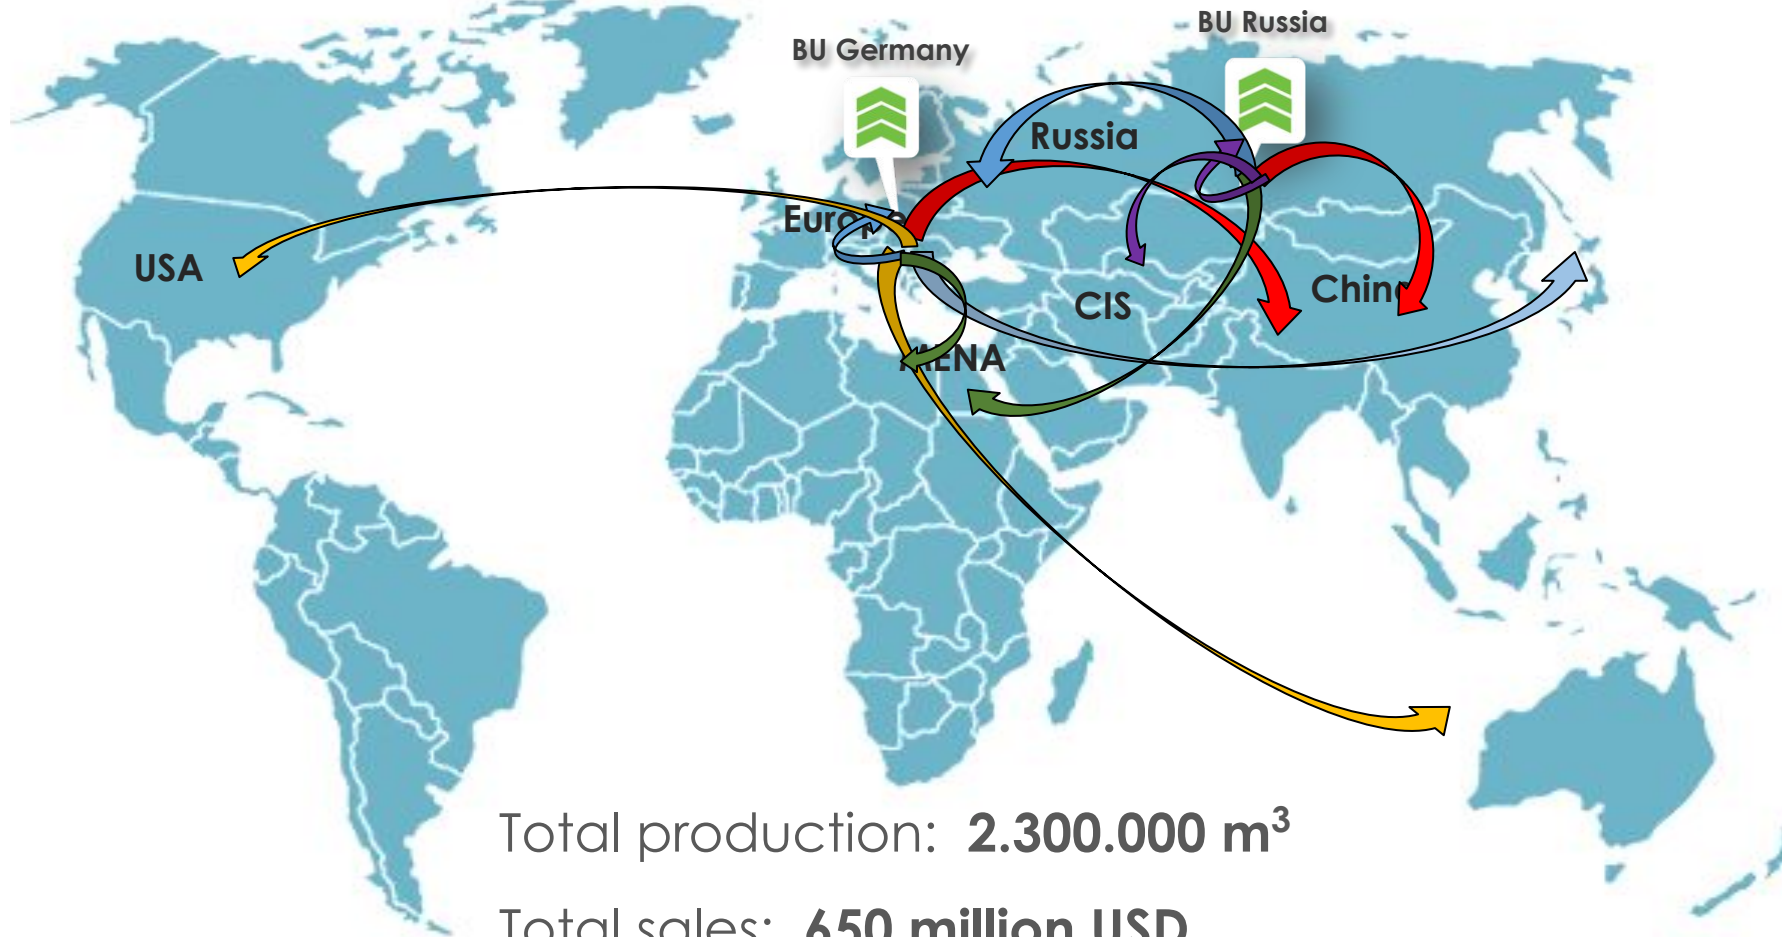

# ILIM TIMBER CORPORATE PROFILE OPERATIONS

- Business Units: Russia and Germany
- Sales organizations: EU, USA, China, Russia and NIS, MENA
- Annual production capacity: **2,65 million m<sup>3</sup>** of sawn timber and **230 000 m<sup>3</sup>** of plywood
- Company headcount: **3000** people
- Species: Pine, Siberian larch, Spruce, Douglas fir, Sitka spruce
- Long-term contracts with strategic log suppliers
