

EXCELSIOR - 2017

Improving English By Music

The project by

Pasha Islanov

the 10th grade Tsivilsk Secondary

School №2

The rationale of the topic:

In our days music is a great importance. I am sure that a lot of people listen to music, especially schoolchildren and students.

The problem:

A lot of schoolchildren who study English spend much time to learn difficult grammar structures and understand them.

Tasks:

1. To find out the meanings of the words «song» and «music»
2. To know more about my favorite style of music EDM.
3. To conduct a survey among pupils of our school.
4. To make a conclusion and to prove that English music and songs help me to improve English through my personal experience.

Karl Julius Weber (1767-1832) -
a German writer.

**"Music is present in common
human speech".**

EDM

Electronic Dance Music is a broad range of genres and styles of electronic music, aimed primarily for the entertainment industry. EDM is typically used in the context of live playing.

My favorite composer is Calvin Harris. I think he is very talented. For me, Calvin is the man who gives a way to me in this wonderful world, the world of good music.

A survey among my friends and classmates. How often do they listen to the English music and songs?

How Often?
