

My teaching practice!!!

From 19th of September to 1st of November.

Gymnasium in Khirsovo!!!

17/09/2010 14:42

I was on teaching practice from 19th September to 1st November . A meeting with the school administration and teachers brought me a positive experience. English teacher tried to assist me in the lessons, and for me it was very important !!!

*During the my lessons I have used methods such as :
Grammar-translation M, The Direct M, The audio-lingual M.*

I also used individual work.

Put little or few.

Diana, Cap

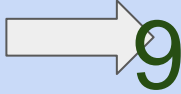

He has got ~~few~~ friends. I drink little coffee, I don't like it. We must hurry. We have got very little time. The Smiths have ~~few~~ money. There were very few people there. There was little lemonade in the bottle. There were few peaches in the basket. He has few English books. There is little water in my glass. There are few bears in the zoo. 9

Dragan Dimitrij

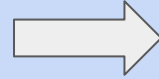

Put much or many

That man drank so much wine, and he smoked so many cigarettes that he has a terrible headache today. There are many new pictures in this room. There are many teachers at our school. Much of her advice was useful. There were many plates on the table. I never eat much bread with soup. Why did you eat so many ice cream. She wrote us many letters from the country. 9

**I evaluated the children using different images.
It did my lesson more interesting and gave better
results**

7-6

8

For each lesson I carefully prepared, I make plans and think through every word.

I tried to find an approach to every student. I tried to pick up an interesting material for children and I try to use computer, projector, blackboard, type recorder but not only textbooks.

During my teaching practice I was trying to prove myself as a thoughtful and responsible teacher, and as attentive, responsive, disciplined person.

Students met me with respect and faithfully perform all my orders.

Want to note that this practice has become for me an important stage in my life. It showed me that I was not mistaken in choosing my profession, that teacher's hard work is close to me.

The work with children is very difficult , but communication with them brings a lot of joy .

After this period of my life, my goal was to become a good teacher, and bring many benefits to the development of future generations.

**Thank
you!!!**
