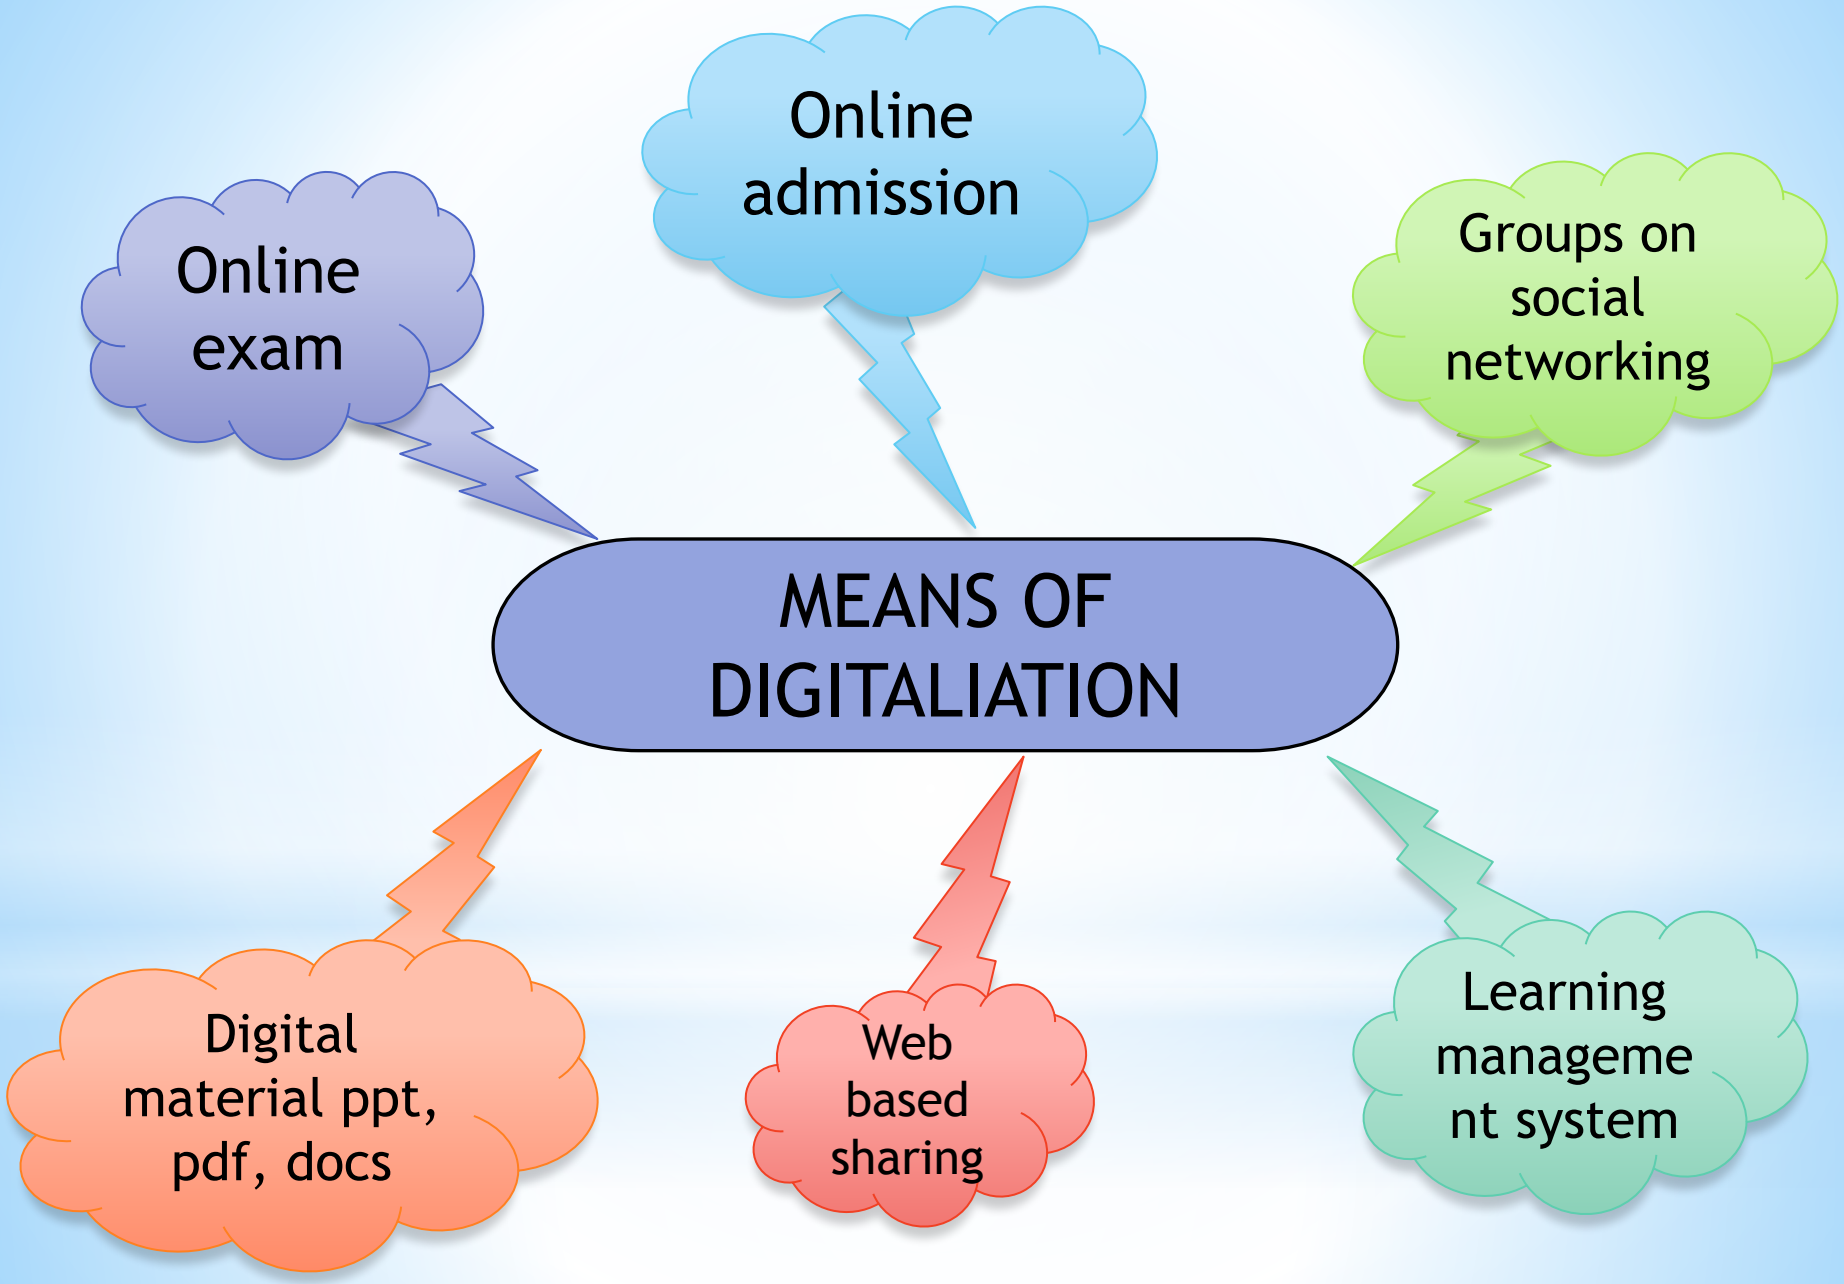
INTRODUCTION

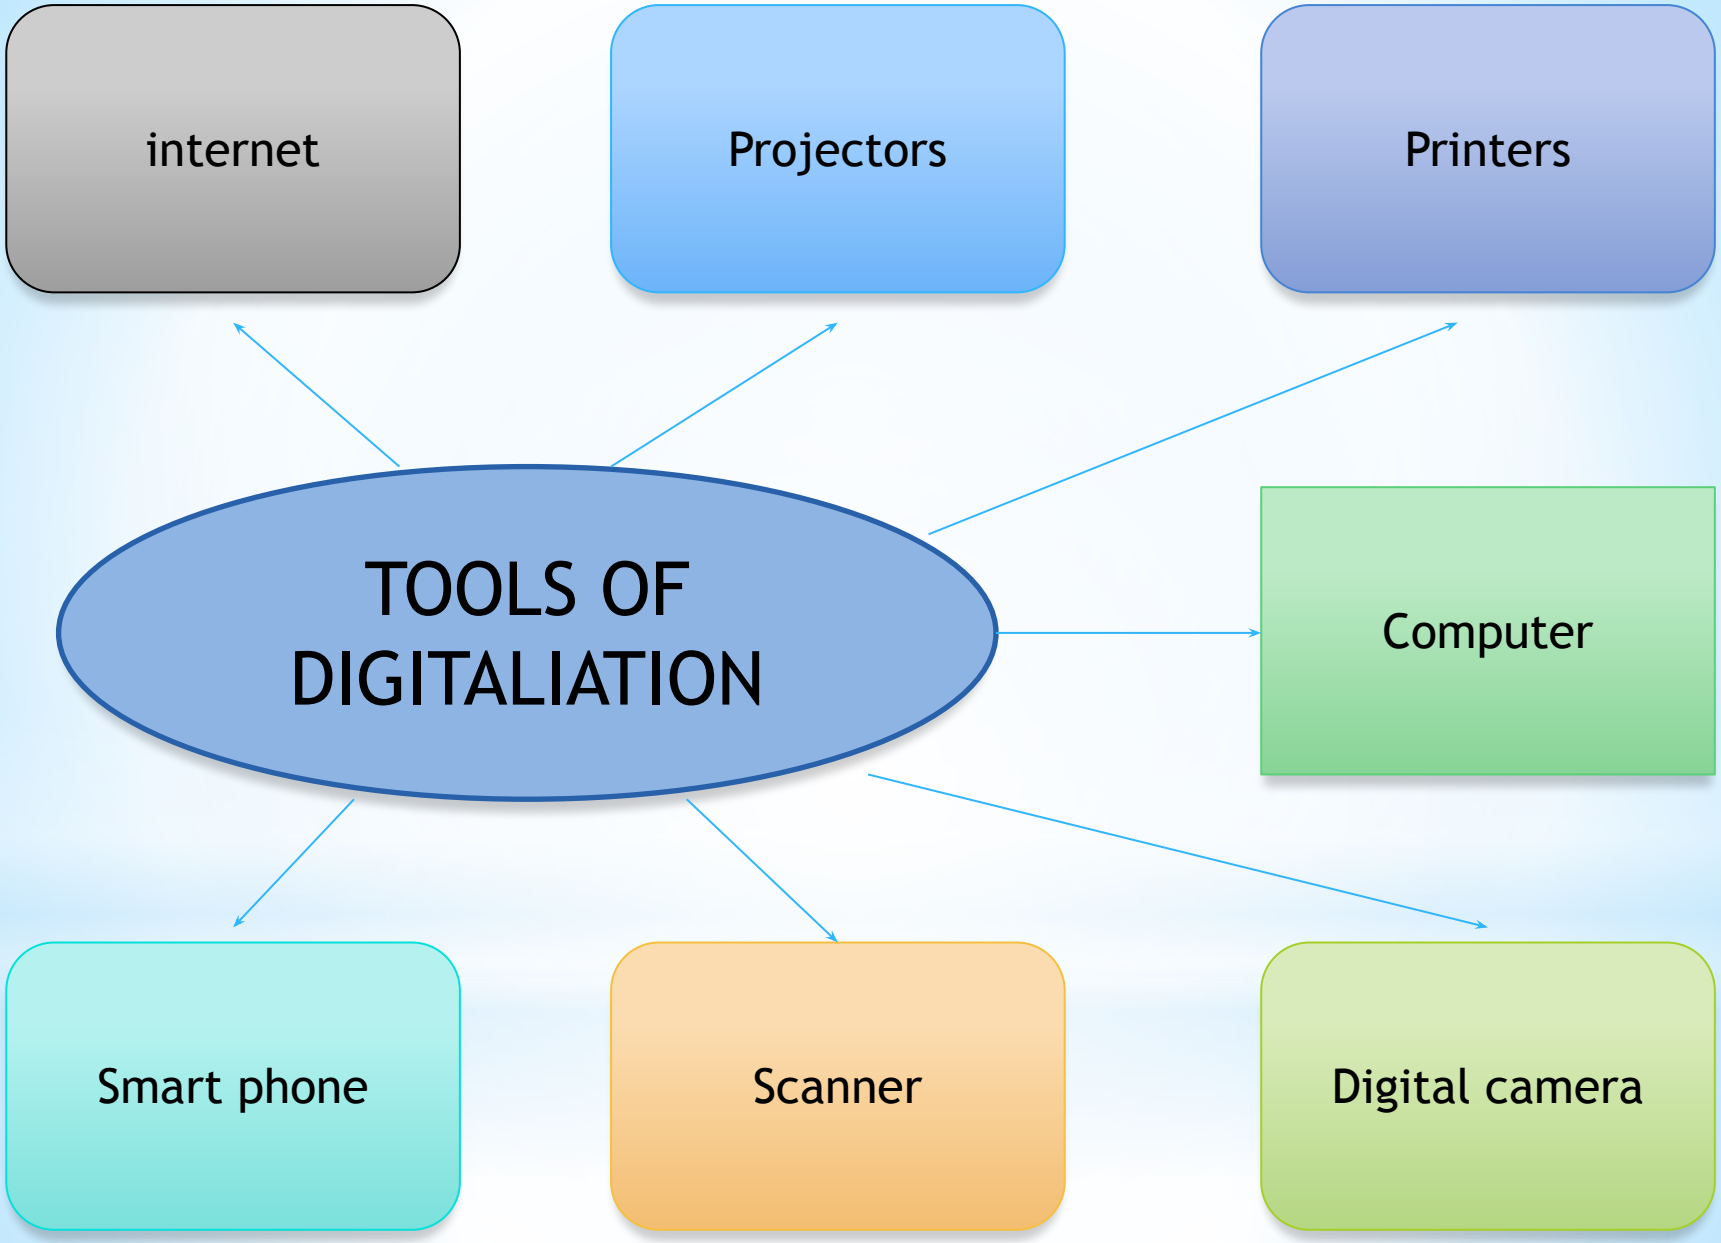
The modern formulation of schooling is fundamentally different from the old. Digitalization of education - this is what the process of transition to the electronic system is called.

DIGITALIZATION

✔ is the process of converting information into a digital (i.e. computer-readable) format, in which the information is organized into bits.



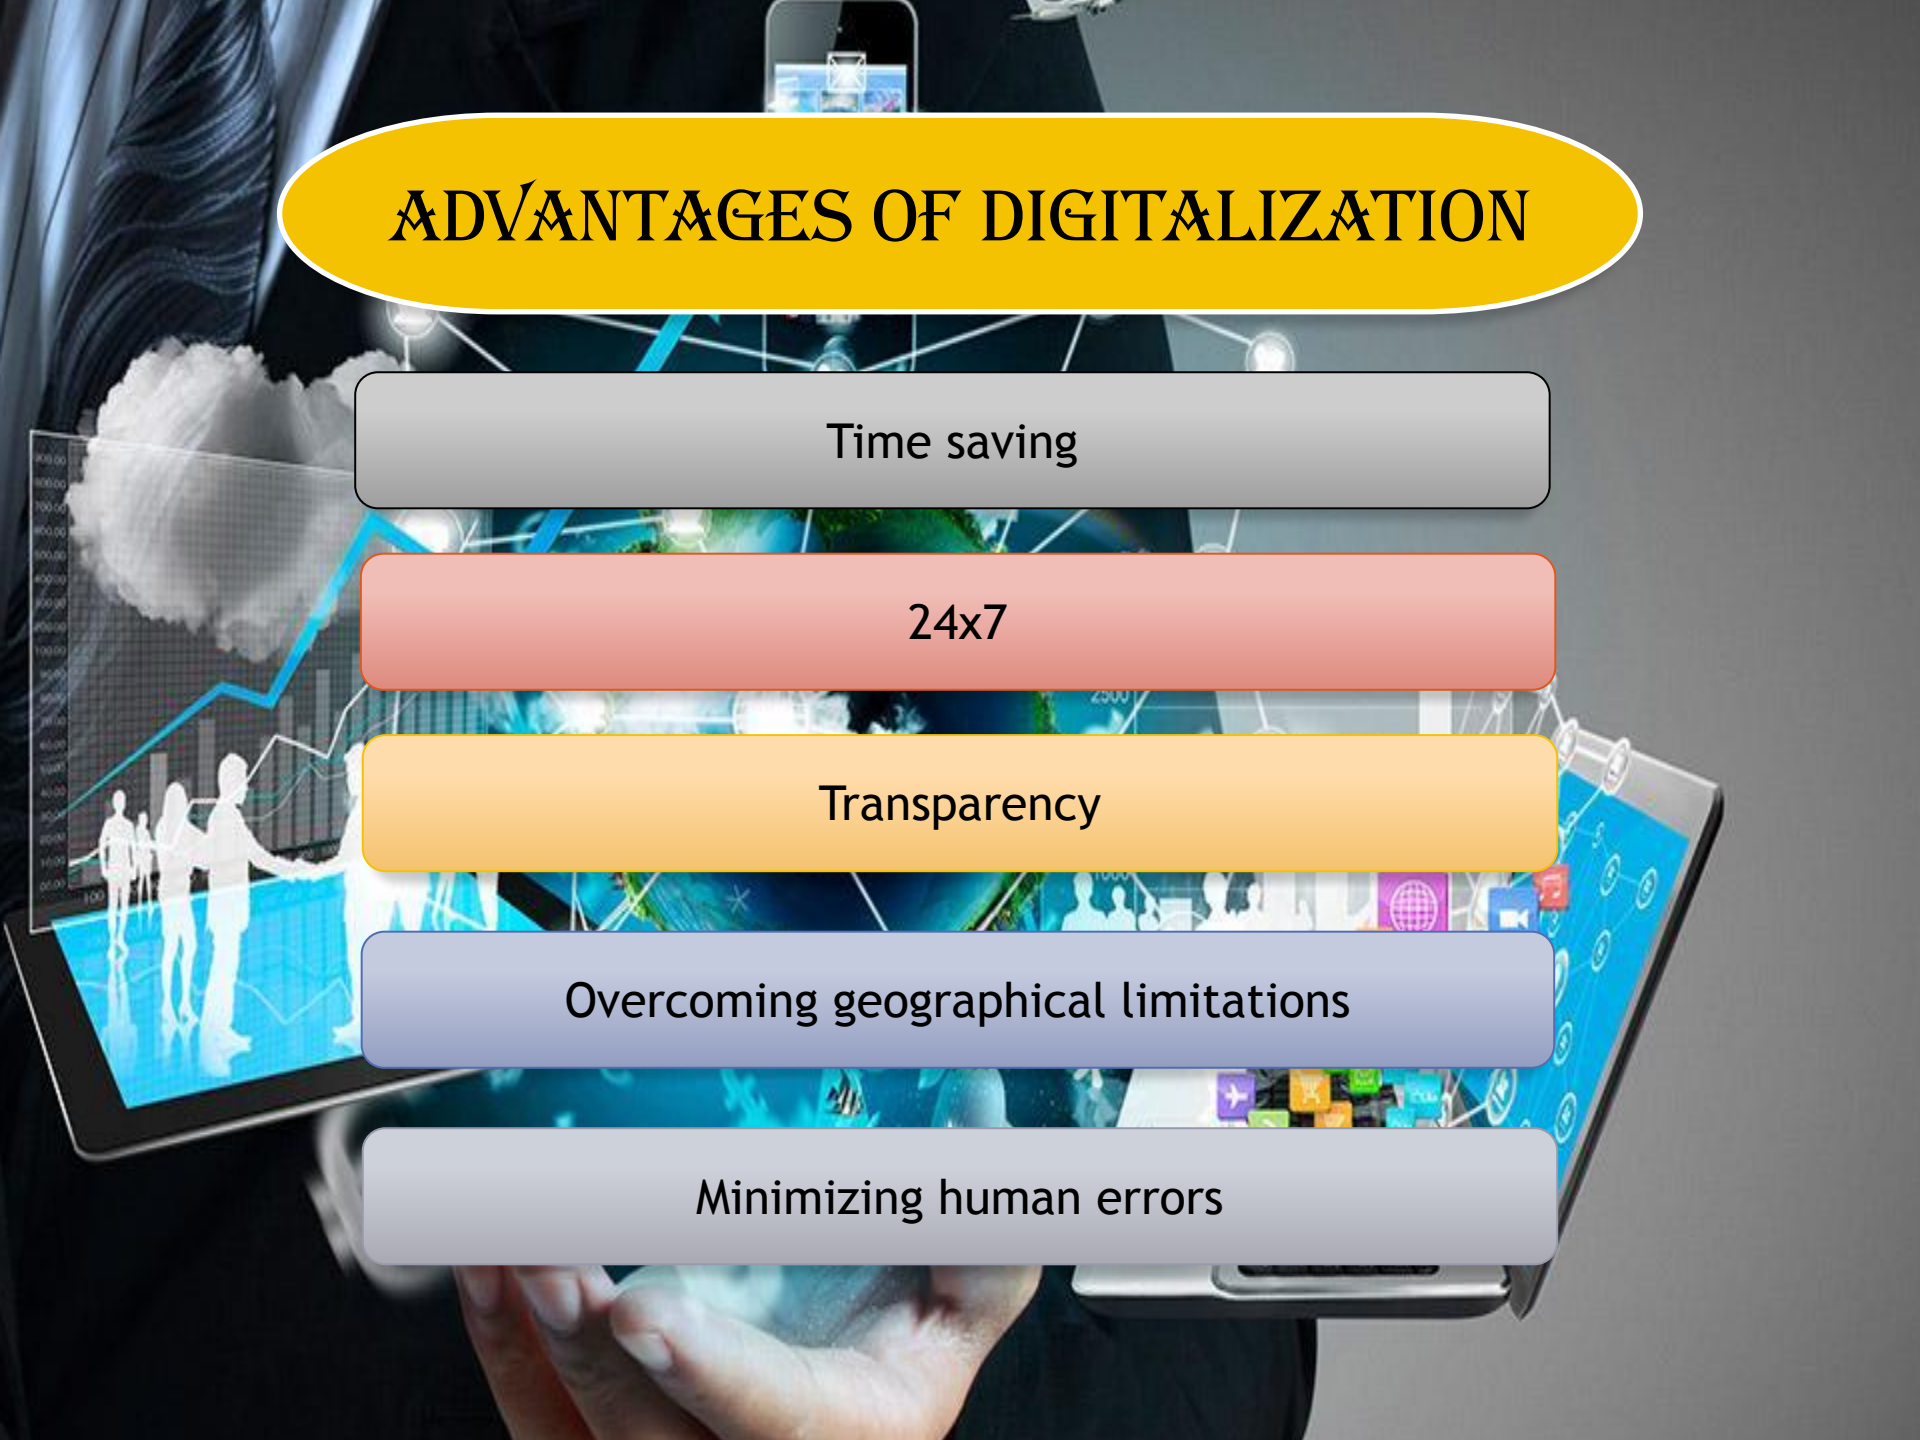
MEANS OF DIGITALIATION
Online admission
Online exam
Groups on social networking
Digital material ppt, pdf, docs
Web based sharing
Learning manageme nt system



internet
Projectors
Printers
TOOLS OF DIGITALIATION
Computer
Smart phone
Scanner
Digital camera

DIGITALIZATION IN EDUCATION

- Digitalization in education refers to the use of desktop computers, mobile devices, the Internet, software applications, and other types of digital technology to teach students of all ages.
- Test-taking using a computer, online universities, e-books, and edutainment are just a few examples of digitalization in education today.



ADVANTAGES OF DIGITALIZATION

- Time saving
- 24x7
- Transparency
- Overcoming geographical limitations
- Minimizing human errors

CONCLUSION.
STEP INTO THE FUTURE.

The transition to digital education is a significant step towards the creation of Internet technologies. Now science is developing at a high speed, new structures are appearing every day. Digitalization of instruction will help students better navigate the information world in the future.

THANK YOU FOR YOUR ATTENTION.
HAVE A GREAT DAY!
