# INTRODUCTION

The modern formulation of schooling is fundamentally different from the old. Digitalization of education - this is what the process of transition to the electronic system is called.

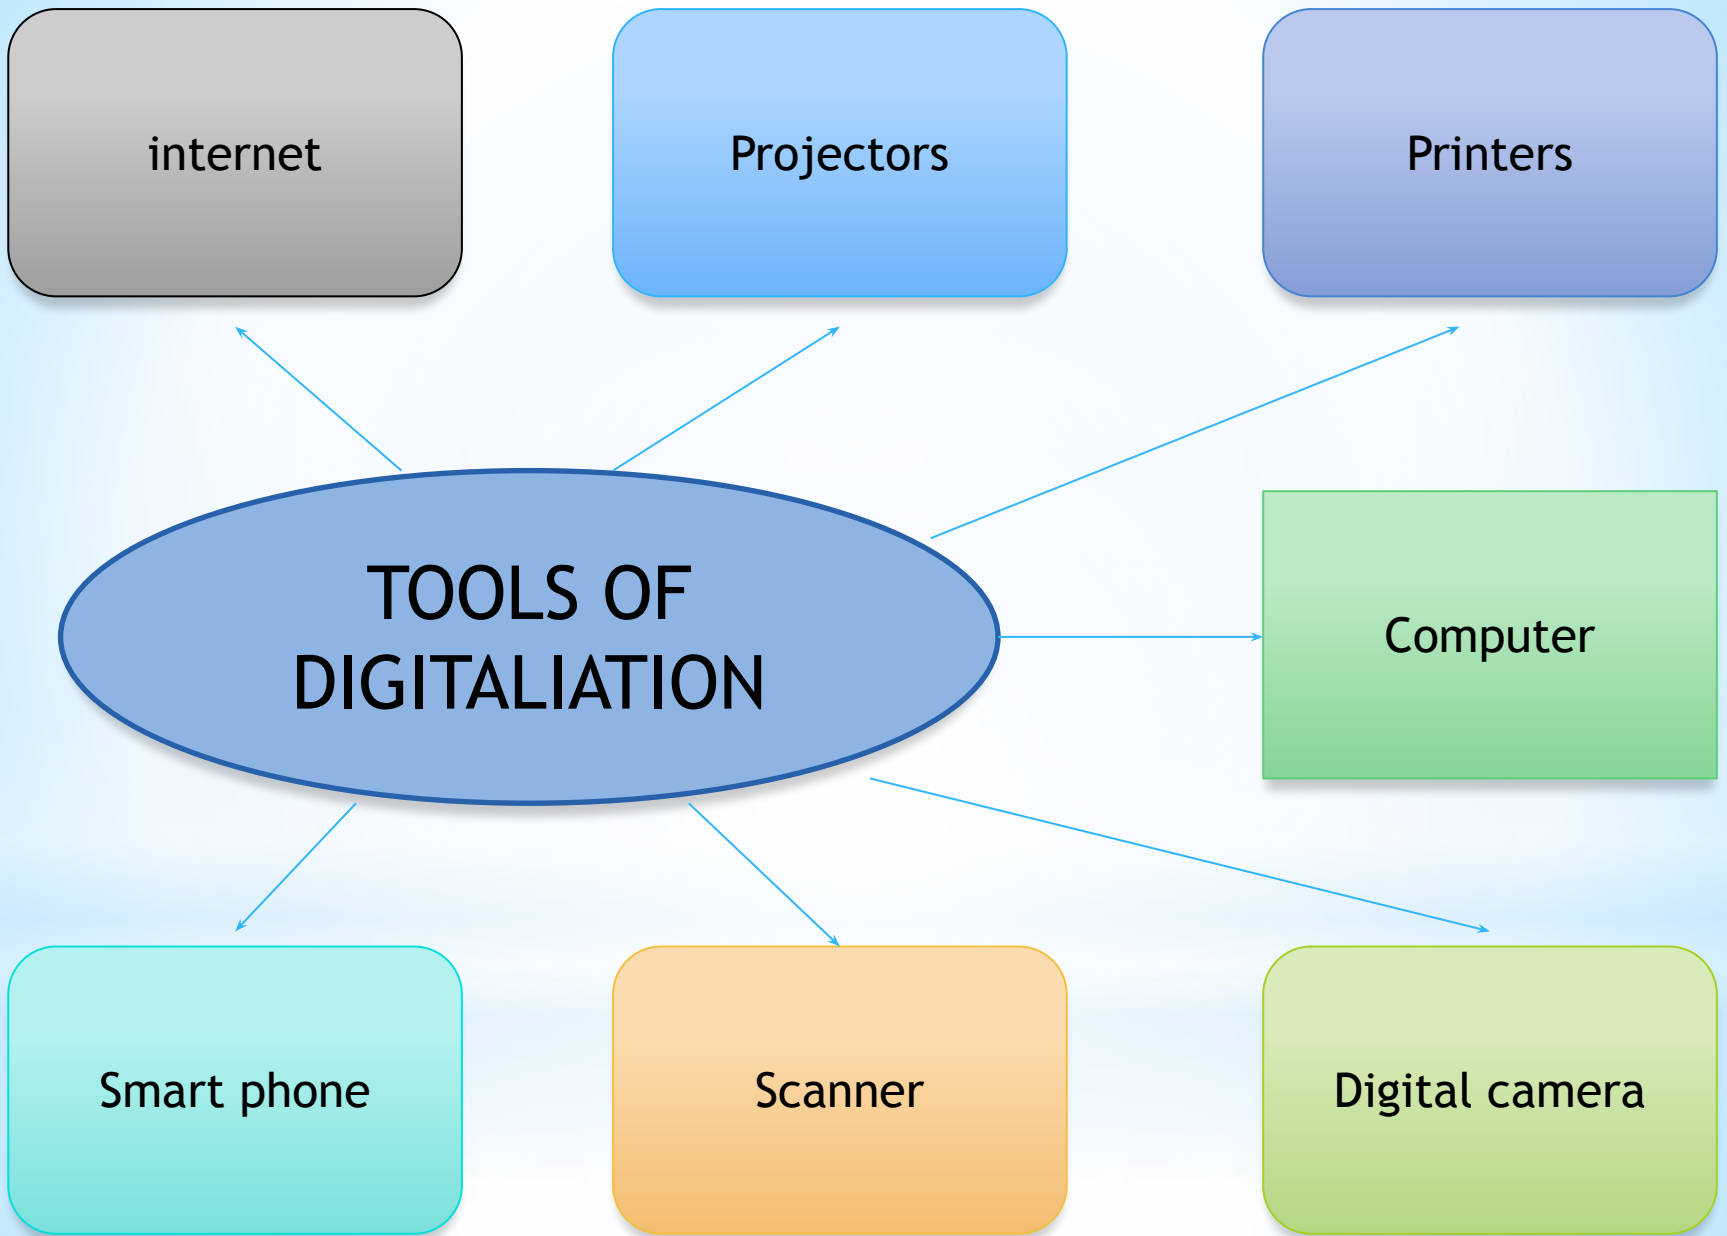

# DIGITALIZATION

✓ is the process of converting information into a digital (i.e. computer-readable) format, in which the information is organized into bits.

# DIGITALIZATION IN EDUCATION

- ❖ Digitalization in education refers to the use of desktop computers, mobile devices, the Internet, software applications, and other types of digital technology to teach students of all ages.
- ❖ Test-taking using a computer, online universities, e-books, and edutainment are just a few examples of digitalization in education today.

# ADVANTAGES OF DIGITALIZATION

Time saving

24x7

Transparency

Overcoming geographical limitations

Minimizing human errors

# CONCLUSION. STEP INTO THE FUTURE.

The transition to digital education is a significant step towards the creation of Internet technologies. Now science is developing at a high speed, new structures are appearing every day. Digitalization of instruction will help students better navigate the information world in the future.

A vibrant sunset over the ocean. The sun is low on the horizon, casting a golden glow across the sky and reflecting on the water. The sky is filled with colorful clouds in shades of orange, red, and purple. In the foreground, there is a rocky beach with dark, jagged rocks. The water is a deep blue with white foam from the waves crashing against the shore.

**THANK YOU FOR YOUR ATTENTION.**  
**HAVE A GREAT DAY!**
