Электрический ток в полупроводниках

Носители заряда

Опытному исследованию закономерностей в полупроводнике

Где в природе встречаются полупроводники?

Si 14

КРЕМНИЙ

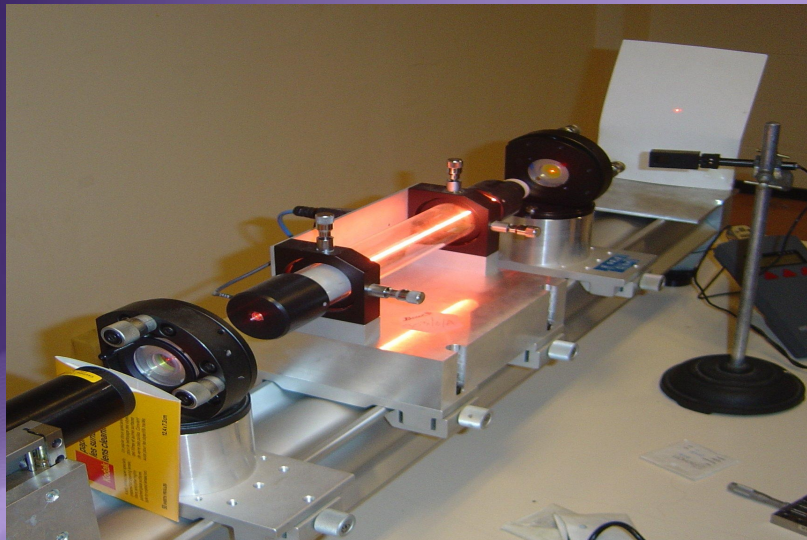

28,086

GOLDSITE

A yellow rectangular card with a black border. On the left side, the chemical symbol 'Si' is written in large black letters. To its right, the number '14' is written in black. Below 'Si', the word 'КРЕМНИЙ' is written in yellow on a black rectangular background. Below that, the number '28,086' is written in black. On the right side of the card, there is a smaller, irregular, metallic gray crystal of silicon, similar in appearance to the larger one on the left. In the bottom right corner, the word 'GOLDSITE' is written in a stylized, yellow font.
