

# YOUTH PROBLEMS DRALE OF COMPUTERS

## Computers are dangerous for teens

- Young generation is influenced by computers in most way. Content of many sites can affect their mind.

## Computer addiction: symptoms

- strange behaviour
- spending large sums of money on computers and software
- mental health problems
- Neglecting school or family obligations
- Using the computer for pleasure or relief from stress

• Our life would be boring without computers. It's hard to believe that one device can provide people with entertainment, news, education, music. With the appearance of computer many things have lost their importance. People don't watch TV

anymore, don't go to the cinema very often. They

don't listen to the radio,

don't play MP3 player.

They've stopped buying newspapers and magazines. Many have

# History of Computer Storage (continued)

- ▶ In the 1970s, IBM introduced 8" floppy disk.
  - ▶ Floppy disks were magnetic with plastic casing and were used to store data at a better speed than any removable device.
- ▶ In the latter half of the 1970s, a 5.25" floppy disk was invented by Allan Shugart.
  - ▶ This smaller floppy was created to be even faster than the larger 8" one.
