

«race on lawn mowers»

The idea of creating a racing lawn mowers appeared in 1972 in England. Legend has it that motorists are not able to purchase the classic motor racing, we decided to use a lawn mower that had been in place for all racing cars, a very accessible price. Lawn mower, unlike the car was in every household.

- The purpose and the idea of race is this, the absence of any commerce. For this kind of sport is not involved nor any sponsors. The design of lawn mowers themselves no change is made. And taking part in the competition riders do not receive prize money. However, income collected during the time of the race goes to charity.

- In order to take part in races on the lawnmower, do not need to have any special skills. Most importantly, the athletes were instructed, and their racing vehicles were checked for compliance with the rules. Mower divided into four groups, depending on the design. There are manual models, they are the cheapest. They need to push ahead. There are also self-propelled mowers. Each group performed their competition. Naturally, workers mower blades are removed before arrival for security reasons. This is quite serious and difficult sport, but it seems from the very funny and naive. One of the complex are considered 12-hour race on lawn mowers. It is so to say the race for survival

- During the competition riders come as much as 300 miles. The longest race is 25 hours. It was held in honor of the British Association for its 25th anniversary in 1997. Just this sport quite like the United States. However, the rules are slightly different. It allowed some modernization "racing" machines. But in general, the idea is the same.
