

Проекты «Идеальное место жительства»

My ideal neighbourhood

выполнены учащимися 9 класса

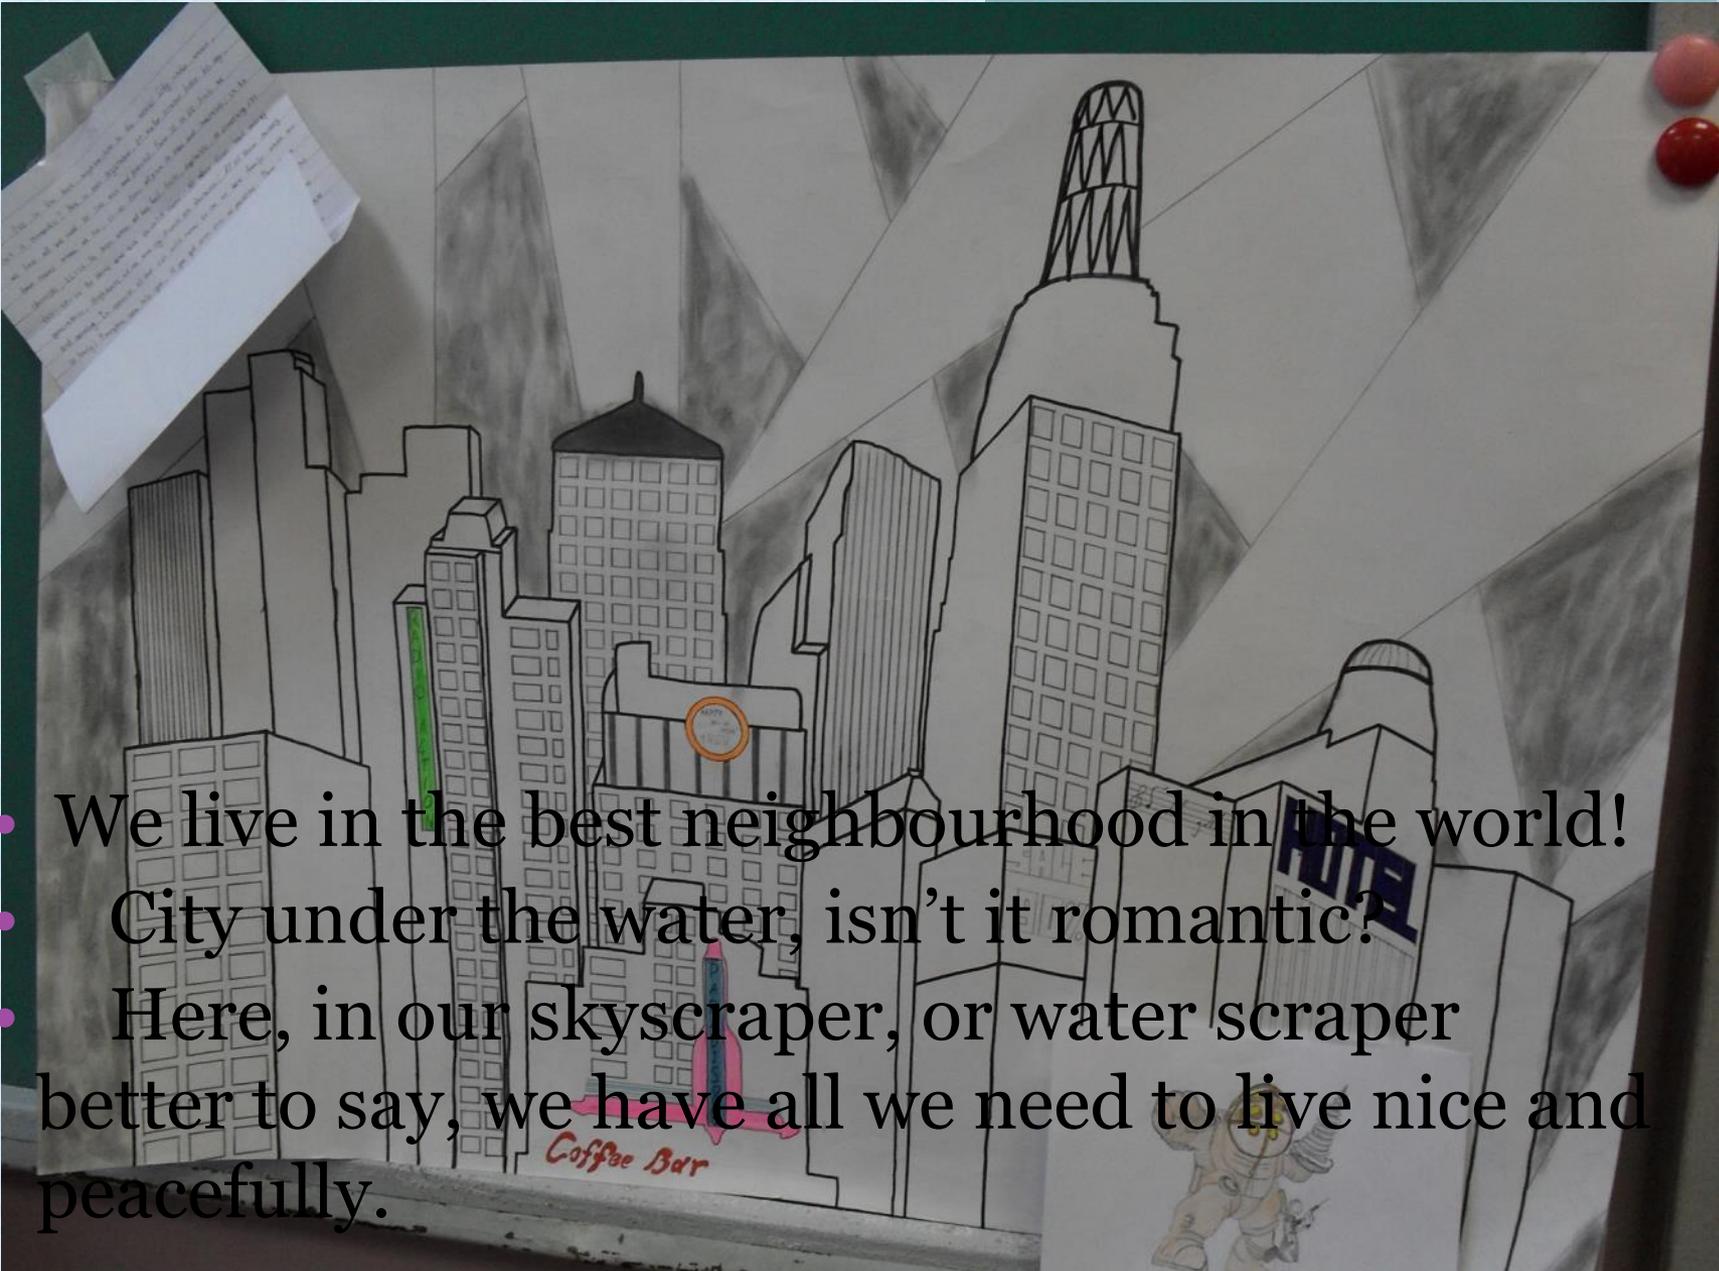

2010 -2011 уч.год

Цель проекта: *отработка лексического материала по теме «Место жительства и среда обитания, а также разработка решения проблемы оптимальной организации своего жизненного пространства с учетом соблюдения принципов сохранения экологии и гуманного отношения к окружающим людям.*

- **Задача.** **Перед участниками была поставлена задача создать модель микрорайона, где было бы все, необходимое для комфортного проживания людей, поддержания их здоровья, условий для учебы, труда и отдыха с занятиями по интересам.**
- **В задачу входил поиск материала, составления текстового описания, а также иллюстрированного оформления на плакате или с использованием мультимедийных средств.**

Rapture

- 
- A hand-drawn illustration of a city skyline under water. The buildings are drawn in a simple, sketchy style. One building has a sign that says "Coffee Bar" in red. Another building has a sign that says "HUB" in blue. A person in a space suit is visible in the bottom right corner. The drawing is on a piece of paper pinned to a dark green surface with two red pushpins. There is also a piece of white paper with some faint text pinned to the top left.
- We live in the best neighbourhood in the world!
 - City under the water, isn't it romantic?
 - Here, in our skyscraper, or water scraper better to say, we have all we need to live nice and peacefully.

WELCOME!

Rainbow

Green Street

Here we imagine the neighborhood of our dream, which is called Green Street.

In our many famous looks work. Here you can see various cuisines for each price. It may be an Italian dish, or Mexican, or Japanese.

It's a beautiful, bright place, where are located all that modern human needs.

Our baker's cook! A famous confectioner has two thousand lemon teleported, "SUG" from bread, per day. Sain-Peterburg to Green Street.

Here is government square. There we can see a public office, the town hall and a fire observation tower.

We are new central square. Here we can see a fountain, made by Russian sculptor Zverof Comely. It has forty powerful pipes, and most powerful pipe likes water up to 15 meters.

Green street

Green

street

Here we imagined the neighborhood of our team, which is called Green street.

In our many famous cooks work. Here you can buy original dishes of various cuisines for cool price. It may be an Italian dish, or Mexican, or Japanese.

It's a beautiful, bright place, where are located all that modern human needs.

Our baker's cooks a famous confuser ten thousand loaves Teleported "SKK" for bread per day. Sain-Peterburg to Green street.

On the corner of our neighborhood you can buy detached cottages in beautiful place.

We are now on Central Square. Here we can see a fountain, made by Russian sculptor Zural Costely. It has forty powerful pipes, and most powerful pipe lifts water up to 15 meters.

Here is government Square. There we can see a bank, a post office, a public office, the town hall and a fire-observation tower.

Анализ мероприятия

- *Большинство учащихся с интересом отнеслись к этому заданию. Оно позволило им проявить свои творческие способности, включить фантазию, а также задуматься о том, как можно было бы улучшить реальную жизнь и стать внимательнее к окружающим людям.*
- *На осуществление проекта была отведена неделя, по завершении которой была проведена защита проектов. Следует отметить, что все учащиеся успешно справились с задачей. Таким образом, было представлено три проекта, 2 из которых сопровождались презентацией в электронном виде.*
