# Запомни:

Ударение падает только на гласные звуки. В слове может быть только один ударный гласный. Знак ударения: /

Способы определить ударный гласный: произнести слово удивленно, «позвать» слово, произнести протяжно.

**Жили-были в стране русского языка мастера: Ах, Ух, Ох, Их, Эх, Ых. Были они очень трудолюбивые. Каждый день мастера ударяли по словам и, тот гласный звук, по которому ударяли, звучал громче других и назывался ударным. Но у мастеров был всего один молоточек и ударить мог только один мастер. Поэтому в слове только один ударный гласный.**
