**Make a difference, Buy-Eco**

Did you know that domestic pollution causes more damage to the environment than industrial pollution? Every year thousands of people get sick from the harmful ingredients in aggressive conventional household products. At Buy-Eco you will find only safe, natural but effective environmentally friendly products for you and your home.

## Welcome to the eco-bin

The eco-bin has been designed to help you easily separate your recycling in the kitchen. There are special compartments for every type of material from paper and glass to tin cans and batteries.

This website explains everything you need to know about the eco-bin and how you can use it to make recycling tidier, more convenient and more fun.

We have endeavoured to make this website as friendly as possible to users who are blind or partially sighted and may use a speech browser. If you have any difficulties please [contact us](#).

[Find out how to use your eco-bin.](#)

In just one year UK households fill enough dustbins to stretch halfway to the moon

## The Volunteer Credit Scheme

RSA 250th Anniversary Coffee House Challenge Winning Project

**Gain experience and credits** by contributing to social and environmental projects.

**Cash in your credits** to receive reductions on college or university fees.

If you are 16 years of age or over you can gain recognition for participating in a range of social and environmental projects in the UK and overseas.

“ StreetCred is so cool. I can get involved in exciting projects that really make a difference to the environment. This gets me credits that I can cash in to reduce my uni fees. ”

## What is eco building?

Simple in concept, complex in reality, eco building involves reducing the impact of buildings on the environment and on the health of those who live within them.

Eco buildings need not necessarily appear radically different, but they do add an additional dimension to the choices made throughout the design and construction process. These extend from selecting optimum insulation levels and the materials to be used, through to choosing suppliers and incorporating renewable energy systems.

## Who are Eco Design and Build?

We are a team of property developers, designers and others committed to building eco-homes to the highest standards and to providing advice on greening your existing home or business.

## Why should I choose an Eco Design and Build home?

Highest standards of quality at affordable prices. We use the new [Code for Sustainable Homes](#) as our main reference.

Further information on our standards can be seen in our ['Sustainable Building' pages](#).

Carbon emissions, rising energy prices, gas shortages, water shortages, flooding, heatwaves, deforestation, depletion of resources, increases in allergies and asthma. Such issues are of growing concern to many people.

The *Eco Design and Build* team are committed to tackling these kinds of issues now, through the homes we build. **We design and construct eco-friendly homes that are designed to reduce their impact on the environment, helping you to live more sustainably and healthily.**

# eco-schools.org.uk

welcome to **Eco-Schools**

Thank you for your interest in the Eco-Schools Programme. By following the programme, your school will become a more stimulating place in which to learn and you will reduce the environmental impact of the whole school on the community.

Once registered your school will be part of an [international](#) group of schools working towards education for sustainable development and a better quality of life for local and global communities.

To get a glimpse of what it is like to be an Eco-School please [click here](#) or on this icon [alternatively click here](#). We hope that you enjoy the process of change and discovery Eco-Schools engenders and, once again, welcome to Eco-Schools.

## being sustainable

**We sure aren't perfect but we're trying to do the right thing.**

It might make us sound like a Miss World contestant, but here at innocent, we want to leave things a little bit better than we find them. We strive to do business in a more enlightened way, where we take responsibility for the impact of our business on society and the environment, aiming to move these impacts from negative to neutral or (better still) positive. It's part of our quest to become a truly sustainable business where we have a net positive effect on the world around us. Below you can see our strategy for doing so as well as our performance to date.

# Green & Black's

# Craig Sams & Jo Fairley

The screenshot displays the Green & Black's Organic website. At the top right, the brand logo "GREEN & BLACK'S ORGANIC" is visible, along with a "JOIN OUR MAILING LIST" button. A navigation menu includes "HOME", "OUR RANGE", "RECIPES", "ABOUT US", "BLOG", and "SHOP". The main visual is a photograph of the "THE CONNOISSEUR COLLECTION" box, which is open to reveal various chocolate bars and a circular "TASTING GUIDE" wheel. The wheel is color-coded by wine type: RED WINE, ROSE, WHITE WINE, SHERRY, and PORT. Each segment of the wheel lists a specific chocolate pairing, such as "G&B's White Chocolate" for red wine and "G&B's 70% Dark Chocolate" for port. The chocolate bars in the box are labeled with flavors like "SEA SALT", "MILK", "DARK 70%", "WHITE", "BUTTERSCOTCH", and "MILK". A "TASTING GUIDE" card is also visible, providing instructions on how to pair the chocolate with wine. At the bottom of the image, there are three buttons: "OUR BARS", "ONCE UPON A TIME", and "BUY NOW".
