

Computer Viruses

The first computer virus

The first virus to spread for the PC was the Brain virus. It appeared in January 1986 in Pakistan.

Trojan virus.

Trojan or trojan horse - a malware that penetrates into a computer like legitimate software.

Examples of trojan programs:

Trojan.Winlock

Windows заблокирован

Для разблокировки необходимо отправить смс с текстом

4126800256

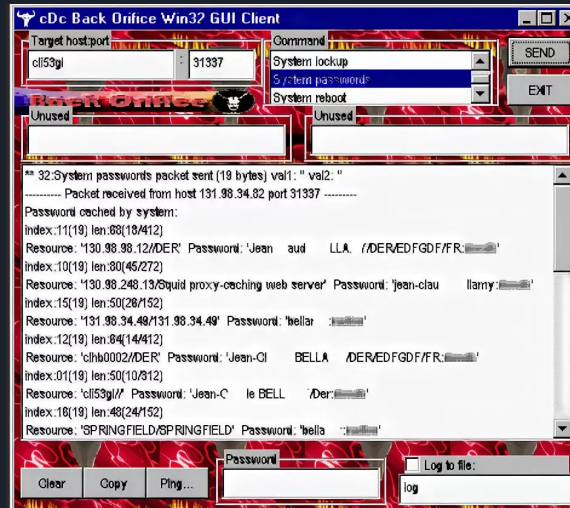

на номер

0649

ввести полученный код:

попытка переустановить систему может привести к потере важной информации и нарушениям работы компьютера.

Активация

WARNING!
YOU'RE IN DANGER!

ALL YOU DO WITH COMPUTER IS STORED FOREVER IN YOUR HARD DISK. WHEN YOU VISIT SITES, SEND EMAILS... ALL YOUR ACTIONS ARE LOGGED, AND IT IS IMPOSSIBLE TO REMOVE THEM WITH STANDARD TOOLS. YOUR DATA IS STILL AVAILABLE FOR FORENSICS. AND IN SOME CASES FOR YOUR BOSS, YOUR FRIENDS, YOUR WIFE, YOUR CHILDREN.

Every site you or somebody or even something, like spyware, opened in your browser, with all images, and all downloaded and maybe later removed movies or mp3 songs - ARE STILL THERE and could brickle your life!

SECURE YOURSELF RIGHT NOW!
REMOVE ALL SPYWARE FROM YOUR PC!

[Removal instructions](#)

Antiviruses

- a specialized program for detecting computer viruses, as well as unwanted programs and restoring files infected (modified) by such programs and prevention

Be careful on the internet and use antivirus to protect your data.
