

NOCTULE BAT

KISELEVA VARVARA

NOCTULE BAT is a giant bat.
It lives in forests in Europe and Asia.

Noctule bat likes to eat worms, butterflies, frogs and even small birds.

Noctule bat sleeps during the day

Noctule bat hunts during the night

People cut down forests and
Noctule bat has no place to live

The population of Noctule bat is getting less

STOP cutting forests- SAVE NOCTULE BAT
