Installing Network

An exciting new look

Windows® Media Center 2004 sport a visual design that combines a sleek look, clean lines, and appealing colors with a task-oriented design and exceptionally streamlined navigation.

The redesigned Start menu makes it easier to find important information and to access the programs you use most frequently.

By automatically cleaning up the notification area of the taskbar and grouping related taskbar items, Windows XP makes it easier to switch between programs and to open, view, or close multiple items at the same time.

Regional and Language Options

You can customize Windows for different regions and languages.

Regional and Language Options allow you to change the way numbers, dates, currencies and the time are displayed. You can also add support for additional languages, and change your location setting.

The Standards and formats settings is set to English (United States), and the location is set to United States.

To change these settings, click Customize.

Text Input Languages allow you to enter text in many different languages, using a variety of input methods and devices.

Your default text input language and method is: US keyboard layout

You can change the keyboard layout when you install Windows. Go to Control Panel than language and time after that you have the options to change display language, location and keyboard layout.

Who will use this computer?

Type the name of each person who will use this computer. Windows will create a separate user account for each person so you can personalize the way you want Windows to organize and display information, protect your files and computer settings, and customize the desktop.

Your name:

2nd User:

3rd User:

4th User:

- **At least one name must be entered in the box**

These names will appear on the Welcome screen in alphabetical order. When you start Windows, simply click your name on the Welcome screen to begin. If you want to set passwords and limit permissions for each user, or add more user accounts after you finish setting up Windows, just click Control Panel on the Start Menu, and then click User Accounts.

For help, Press F1.

Thank you!

Congratulations, you're ready to go! Here's what you just accomplished:

Your computer is configured for Internet access.

To learn about the exciting new features of Windows Media Center 2004 PC Edition, take the Windows XP product tour. You can also find useful information in the **Help and Support** Center. These options are located on the **Start** menu.
