

HOMEWORK

1. Describe the product
2. Define Product Risks for the product and prioritize them
3. Define what testing types cover these risks:

Product Risks	Priority	Testing type

4. Specify what testing types are performed by your team, what are by other teams (ideally to specify what teams do what testing)
5. Describe testing approach – what testing types when performed/ how combined
6. * Additionally you can complement points above by other test strategy sections.
