- Stores are very important in our life because they have everything you need for a comfortable life.
- In stores, you can buy essential goods.

- There are many types of stores, for example:
- A General store, there are many departments where you can buy everything you need. In the meat Department you can buy meat in a bakery to buy fresh bread and other baked goods, in the fruit Department you can buy fruit, buy milk dairy products.
- There are also other stores, jewelry can be bought in a jewelry store, men's accessories can be bought in a men's store, you can buy perfume in a perfume store, educational supplies can be bought in stationery.

- As for me, I like to go to Auchan. It has many different departments, from food to office supplies. So there are quite cheap products.
- I also really like to go to shopping centers. There are a lot of departments where you can buy everything. Some shopping centers even have a games area with video game consoles. Most of all, I like the electronic goods Department, where you can see new phones, computers, etc.

- I usually go to stores with my best friend Andrey. He and I love to go to Auchan and shopping centers. We don't go to shopping centers very often, but we go to Auchan almost every day.
- As for shopping centers, there we usually buy gifts, equipment, etc.
- In my opinion, we were already in all the stores in our city, and I would like to go to some other stores.

- As for me, I like to go shopping. It doesn't matter what time it is a clothing store, perfume store, or grocery store. For me, the most important thing in going shopping is having fun with people close to me.

THANK YOU
