

Parents mustn't advise young people what profession to choose

- 0 Введение + \_ возможен минус
- 0 Choosing a right profession is very important nowadays (желательно подчеркнуть для young people) .
- 0 Some people are convinced that young people should rely on their parents in this matter (choosing their profession) , while others believe that career choice must be independent
- 0 Если изучить условие – проблема должны ли родители давать совет о выборе профессии ? Точнее бы написать о родителях ( в данной работе на кого полагаться в выборе- вроде бы похоже – но фокус другой
- 0 Вторая точка зрения выражена абстрактно ( нет parents/ young people о них работа)

# Мнение автора -

- o I would like to express my point of view on this situation (о ситуации речь не идёт)
- o My personal opinion is that teenagers should choose their future profession by themselves (young people не teenagers) . First of all, if a (young) person **decide (decides)** to choose his (their) career by himself (themselves) he becomes more independent and confident (+ логика) . Secondly, young people know themselves better and when they are choosing their career they often decide **to tie their lifes (lives)** with their favourite activities
- o Мнение автора и первый аргумент неточный

# Мнение оппонента -

- o But there is another point of view on this problem. (не выражена точка зрения)
- o The most common argument against this (против чего – мысль не завершена) is that parents have more experince in life than their children. Because of this they think they know better what is can be realy important in life
- o Нет проблемы совета – выбора профессии

# Опровержение -

- o I cannot agree with this opinion (the opinion given above – логика) I cannot agree with this opinion.
- o I think that children can be very different from their parents in terms of interests and worldviews. That means that the wrong choice of parents can restrict the freedom of a person in the future and even ruin his life.(нет контекста выбор профессии)

parents have more experince in life than their children. – этот аргумент не опровергнут – появилась другая проблема разница интересов и мировоззрений

o .

# Заклучение -

- o Taking into consideration all mentioned above I would like to say that young people should be smart about their career choices and not rely too heavily on their parents' opinion.
- o Прежде всего не совпадает с мнением автора во втором параграфе
