

This is a wolf.

The wolf lives in most of Eurasia and North America.

It is very strong and dangerous. It lives in the forest. Its head isn't big. Its neck is short. Its paws are small but very strong. Its teeth are sharp.

The color of the wolf is grey-brown, white, pure white and black.

The wolf can run, jump and swim, but he can't climb trees and fly.

The wolf is a predator. It eats: deer, rabbits, pigs, chickens and others

I love wolves!

The end. Thanks for watching
