

JIRA INTRODUCTION 2015

AGENDA

1. What is JIRA?
2. JIRA Advantages and disadvantages
3. Workflow in JIRA
4. What is an Issue?
5. Standard actions on issue
6. Search for an issue
7. Timesheet
8. Setting up e-mail notification
9. Boards in JIRA

1. WHAT IS JIRA?

WHAT IS JIRA?

JIRA is ...

- ✓ a web Atlassian tool
- ✓ the tracker for team planning
- ✓ configurable and extendable tool

JIRA ...

- ✓ adapts to business processes
- ✓ maintains your historic data
- ✓ used to prioritize, assign, track, discuss, report and watch issues\tasks

2. JIRA ADVANTAGES AND DISADVANTAGES

JIRA ADVANTAGES AND DISADVANTAGES

ADVANTAGES

- Team work facilitation
- Full visibility of the supported processes for the team and process/unit stakeholders
- Planning
- Time-reporting
- Tasks prioritizing
- Clear KPIs for People Management

DISADVANTAGES

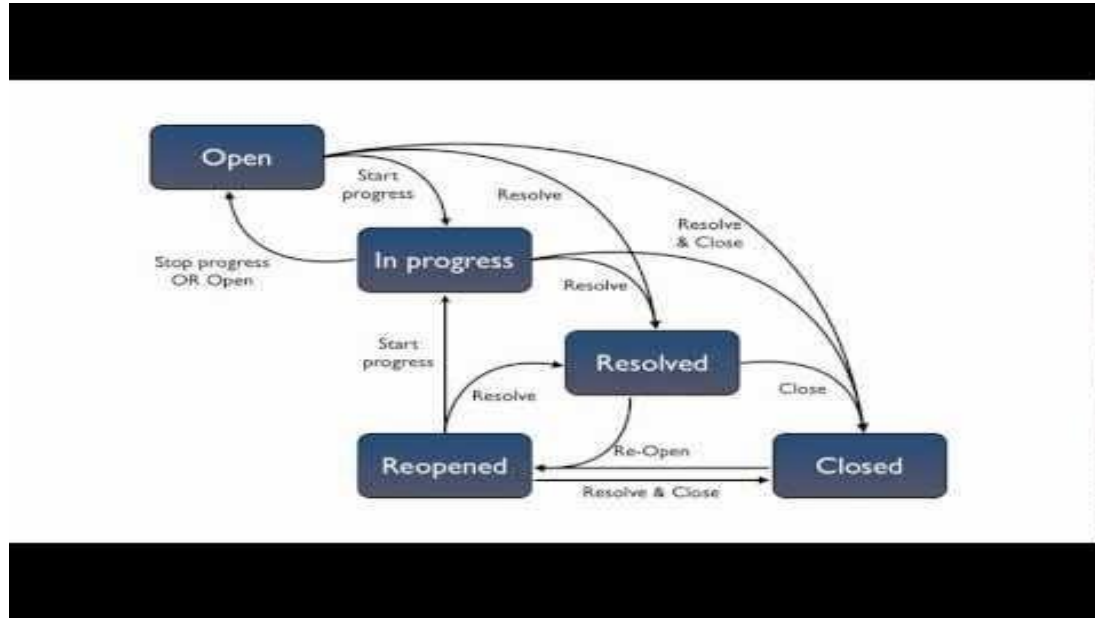

- JIRA Performance
- Lack of training on project management
- Time and efforts spent on «Getting acquainted stage»

3. WORKFLOW IN JIRA

WORKFLOW IN JIRA

A JIRA workflow is the set of statuses and transitions that an issue goes through during its lifecycle.

A scenic landscape featuring a calm lake in the foreground, with several ice floes scattered across its surface. In the background, dark, forested mountains rise under a dramatic, cloudy sky. The sun is low on the horizon, creating a soft glow and reflecting on the water. A blue banner with white text is overlaid on the middle of the image.

4. WHAT IS AN ISSUE?

WHAT IS AN ISSUE?

Issue - any task that requires an action from a person.

Issue types:

Bug – a problem which impairs or prevents the functions of the product.

Task – a task that needs to be done.

Sub-task - are useful for splitting up a parent issue into a number of smaller tasks that can be assigned and tracked separately.

Story - in JIRA Agile, a story is represented as an issue, and individual tasks within the story are represented as sub-task.

Epic - An epic captures a large body of work. It is essentially a large user story that can be broken down into a number of smaller stories. It may take several sprints to complete an epic.

A photograph of a dense forest with tall, slender trees and vibrant green foliage. Sunlight streams through the canopy, creating a bright, airy atmosphere with visible light rays. The text is overlaid on a teal banner in the lower-left quadrant.

5. STANDARD ACTIONS ON ISSUE

STANDARD ACTIONS ON ISSUE

- Create
- Edit
- Assign
- Comment
- Log work
- Attach
- Link
- Clone
- Delete

The screenshot shows the JIRA interface for an issue titled 'TEST' in the 'EPM-HRM' project. The issue ID is 'EPMHRM-2117'. The 'More' dropdown menu is open, displaying a list of actions. The actions are: Log Work, Mind Map, Log Work, Plan Time, Start Tracker, View Worklogs, Agile Board, Rank to Top, Rank to Bottom, Attach Files, Attach Screenshot, Add Vote, Voters, Stop Watching, Watchers, Create Sub-Task, Convert to Sub-Task, Move, Link, Clone, Labels, and Delete. The 'Log Work' and 'Attach Files' actions are highlighted with red boxes. The 'Move', 'Link', and 'Clone' actions are also highlighted with red boxes. The 'Edit', 'Comment', and 'Assign' buttons are also highlighted with red boxes. The 'Start Progress', 'Resolve Issue', and 'Close Issue' buttons are visible in the top right. The 'Structure: Global' section is expanded, showing 'Global' as the selected structure. The 'Activity' section is empty, with a 'Comment' button visible. The 'Labels' section is also empty. The 'Transitions' section is visible at the bottom right.

CREATING AN ISSUE

In this lesson, you will learn how to create an issue in JIRA. The **Create** button is available from every page in JIRA.

Let's create an issue now.

Click **Create** button at the top of the screen or just type **C**.

CREATING AN ISSUE

Create Issue Configure Fields

Project*

Issue Type*

Epic Name*

Provide a short name to identify this epic in the GreenHopper boards.

Summary*

Priority

Due Date

Component/s

Start typing to get a list of possible matches or press down to select.

Affects Version/s

Start typing to get a list of possible matches or press down to select.

Fix Version/s

Start typing to get a list of possible matches or press down to select.

Assignee

Create another

1. **Project.** Every issue is associated with a project.
2. **Issue Type.** This field allows you to select the kind of issue you want to create, such as a bug or task, etc.
3. **Issue Summary.** Every issue requires a summary. A summary should be a very brief summation of the issue. The summary acts as the title of the issue.
4. **Set Priority.** You can set the priority of this issue. Setting the priority can help your team during the triage process.
5. **Set Due Date.**
6. **Affects Version.** This field is used to tell people which version of the project this new issue relates to.
7. **Assignee.** Here you can choose whom to assign the issue to.
8. **Enter Issue Description.** Here's where you can describe the issue in as much detail as you'd like.
9. **Create.** Once you click 'Create', your new issue will be added to JIRA.

ISSUE SUMMARY

All Task (sub-task) fields must be fulfilled in **English** language only.

All Tasks should be named according to the rule:

“WHERE_WHAT_WHEN”

For example: "IT Services_Summer Party_09-2015".

For **“Ad-hoc”** Tasks (non-hosted tasks) don't forget to add verb to the title.

For example: "IT Services_organize Summer Party_09-2015".

EDITING AN ISSUE

1. Click the **Edit button** (at the top left on the “view issue” page).

2. Hover your mouse over a field and **click the pencil icon** to edit it inline.
3. Just type **E**.

LOG WORK ON ISSUE

Log Work

Time Spent* (eg. 3w 4d 12h) ⓘ
An estimate of how much time you have spent working.

Date Started* ⓘ

Remaining Estimate

- Adjust automatically
the estimate will be reduced by the amount of work done, but never below 0.
- Leave estimate unset
- Set to (eg. 3w 4d 12h)
- Reduce by (eg. 3w 4d 12h)

Work Description

🔒 - Viewable by All Users

[Find more time-tracking add-ons...](#)

LOG WORK ON ISSUE

To log work use the following format:

- **w** - weeks
- **d** - days
- **h** - hours
- **m** - minutes

EDITING AND DELETING A WORK LOG ENTRY

EDITING A LOG WORK

- Open the necessary issue Tempo section
- Click the pencil icon
- Make the appropriate changes
- Click Log to return to the issue, and verify that changes were made.

DELETING A LOG WORK

- Open the necessary issue Activity section
- Select Work Log tab
- Click the Delete icon
- Click Delete to confirm the deletion and return to the issue.
- Verify that the issue's Work Log tab no longer displays the work log entry that you just deleted.

TIME TRACKING

Original Estimate (blue) – the amount of time originally anticipated to resolve the issue.

Remaining Estimate (orange) – the remaining amount of time currently anticipated to resolve the issue.

Time Spent (green) – the amount of time logged working on the issue so far.

CREATING A SUB-TASK

Sub-task issues are useful for splitting up a parent issue (Task) into a number of smaller tasks that can be assigned and tracked separately. You need to create Sub-Task when:

- When **different people** are responsible for execution process of one Task
- When we have **different business results** related to the same Task

HOW TO:

- Navigate to the issue you would like to be the parent issue of the sub-task you are about to create.
- Select **More** and **Create Sub-Task**.
- Fill in the details as needed, and then click **Create** at the bottom.

Sub-tasks have all the same fields as standard issues, e.g. Summary, Description, Reporter, Assignee, Status. Note that sub-tasks have a different set of issue types from the standard issue types.

The screenshot shows a Jira issue interface with a 'More' dropdown menu open. The menu is divided into sections: 'Details', 'Description', and 'Tempo'. The 'Create Sub-Task' option is highlighted with a red box. Below the dropdown, the 'Structure: Global' label is visible.

Section	Item
Buttons	Edit, Comment, Assign, More
Details	Log Work, Mind Map
Description	Log Work, Plan Time, Start Tracker, View Worklogs, Agile Board, Rank to Top, Rank to Bottom
Tempo	Attach Files, Attach Screenshot, Add Vote, Voters, Stop Watching, Watchers
More	Create Sub-Task (highlighted), Convert to Sub-Task

RESOLVING AN ISSUE

1. Press **Resolve** button in the upper panel bar
2. Move the necessary Task from one column to another (Tracking board)
3. And don't forget about Issue Resolution. JIRA by default will mark an issue to be Unresolved when the resolution field is not having any value on it.
4. Adding comments to an issue is a useful way to record additional detail about an issue, and collaborate with team members.

Start Progress **Resolve Issue** Close Issue

0 of 3 In Progress 0 of 28 Resolved

EPM/IRM-2117
TEST

Resolve Issue

Resolving an issue indicates that the developers are satisfied the issue is finished.

Resolution* Please select...

Fix Version/s

Start typing to get a list of possible matches or press down to select.

Comment

CLOSING AN ISSUE

1. Choose “Close Issue” button in the upper panel bar
2. Move the necessary Task from one column to another (Tracking board)
3. Peer review is **obligatory** during **1st** month of JIRA usage. After 1st month – HR Manager is responsible for chosen the appropriate option for his\her team.
4. If there is **only one HR** for the project (Assignee=Reporter) then she or he is still responsible person for the whole Quality Control process

REOPEN AN ISSUE

1. Open the resolved or closed JIRA issue you wish to reopen
2. Select More -> Reopen Issue
3. Fill in Comment field
4. Click on “Reopen issue” button
5. Change Due Date

EPM-HRM / EPMHRM-2117
TEST

Edit Comment Assign More Close Issue **Reopen Issue**

Reopen Issue

Reopening an issue indicates that it has not been completed, and should be looked at again.

Fix Version/s

Start typing to get a list of possible matches or press down to select.

Reopen Issue Cancel

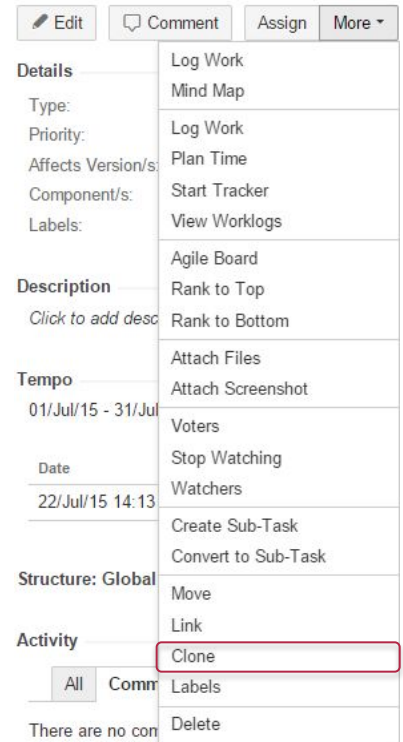

CLONING AN ISSUE

Cloning, or copying, an issue lets you quickly create a duplicate of an issue within the same project. The clone issue is a replica of the original issue, containing the same information stored in the original issue – e.g. Summary, Affects Versions, Components, etc. The clone issue can also be linked to the original issue. A clone issue is a separate entity from the original issue.

1. Open the JIRA issue you wish to clone
2. Select More
3. Select Clone
4. You need to edit the clone issues Summary and Due Date

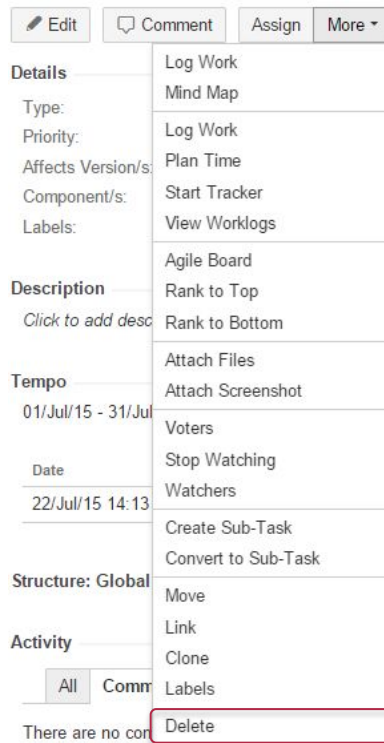

You can include or not to include:

- Sub –Task
- Links
- Attachment

DELETING AN ISSUE

- On your Tracking Board select the issue that you want to delete
- Select More
- Select Delete in the List

A man with a beard and long hair is sitting at a desk in an office. He is wearing large white headphones and has his hands clasped in front of him, looking thoughtful. He is wearing a grey long-sleeved shirt and a tan vest. In front of him is an open laptop. The desk also has a mouse, a tissue box, and a desk lamp. A window in the background shows a cityscape.

6. SEARCH FOR AN ISSUE

SEARCH FOR AN ISSUE

The quickest, simplest, and easiest way to search for issues is the Quick Search bar, which is located in the universal header.

Jump to an issue. If you type in an issue's key, you'll jump straight to that issue.

Smart Querying. JIRA recognizes key terms and uses a simple syntax to search for issues. For example, typing in 'my open bugs' returns all issues assigned to you that haven't been resolved.

Free-text searching. You can search for any word within the issue(s) you are looking for, provided the word is in one of the following fields: Summary, Description, Comments.

Searching JIRA issues from your browser's search box. If you are using Firefox or Internet Explorer 8, you can add your JIRA site as a search engine/provider via the dropdown menu next to the browser's search box. Once you add your JIRA site as a search engine/provider in your browser, you can use it at any time to conduct a Quick Search for issues in that JIRA site.

7. TIMESHEETS

TIMESHEETS

Select Tempo->Timesheet->Select necessary type of timesheet

Select necessary time period

Project - EPMB-ECOM (EPMHECOM) - 8 of 48

Timesheets displays useful time tracking information on issues for a particular project, team, account, user, etc.

A man with short brown hair, wearing a dark blue peacoat with a fur collar and a brown messenger bag, is standing on a train platform. He is looking down at a smartphone in his hands. The platform has a white train car on the left and a wooden structure with a red roof on the right. The background is slightly blurred, showing other people and the train tracks.

8. SETTING UP EMAIL NOTIFICATION

RECEIVING SEARCH RESULTS VIA EMAIL

JIRA enables you to subscribe to an issue [filter \(a saved search\)](#). JIRA will then run the search according to your specified schedule, and will email the results to you.

You can specify when and how often you would like to receive the search results, e.g. 'Every hour between 9.00AM-5.00PM, Monday-Friday', or 'The last Friday of every month at 7.00AM'.

1. Choose Issues > Manage Filters.
2. Locate the filter you are interested in and click on its Subscribe link.
3. Select one of the following types of schedule.
4. Click **Subscribe**.

Filter Subscription

SHARING AN ISSUE

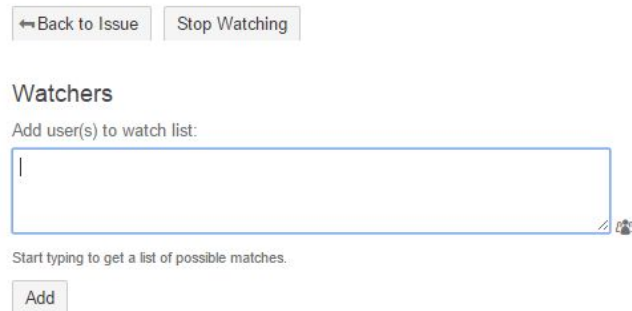

1. View the issue you want to share.
2. Click the Share button at the top-right or simply type **S**.
3. Specify JIRA users.

The screenshot shows the 'Share' dialog box in JIRA. At the top right, there are two buttons: a share icon and 'Export'. Below this is a 'Link to Issue' section with a text input field containing the URL 'https://jira.epam.com/jira/browse/EPMH'. Underneath is a 'User name or email' section with an empty text input field. The 'Note' section has a text area with the placeholder text 'Add an optional note'. At the bottom right, there are two buttons: 'Share' and 'Cancel'.

WATCHING AN ISSUE

1. Open the necessary issue.
2. Click Start watching this issue link.
3. Select More Actions > Watchers to open the Watchers page.

The screenshot shows the 'Watchers' page in JIRA. At the top, there are two buttons: 'Back to Issue' and 'Stop Watching'. Below this is the 'Watchers' section with the heading 'Add user(s) to watch list:'. There is a large text input field for entering user names. Below the input field, there is a prompt 'Start typing to get a list of possible matches.' and an 'Add' button.

A close-up photograph of a woman with dark hair, wearing a blue and white plaid shirt, focused on working on a wooden board. She is holding a pencil in her right hand and appears to be drawing or writing on the board. The background is softly blurred, showing what looks like a workshop or office environment with wooden walls and some equipment. A teal banner with white text is overlaid on the left side of the image.

9. BOARDS IN JIRA

KANBAN BOARD

Kanban is a catalyst for change through small, incremental improvements to your existing process - be it scrum or otherwise. Rooted in lean manufacturing, Kanban is a signaling system that can be effectively applied to software development, DevOps, IT operations, HR processes and many other processes.

SCRUM BOARD

Teams who use scrum plan work in *sprints*, short blocks of time in which the team can estimate, and return value back to the customer. Software development teams, as well as teams in other industries, use scrum to deliver complex solutions in a structured, predictable way.

The product owner manages the *backlog*, ensuring the team is working on the highest-priority items first. With JIRA Agile, the team can organize stories in sprints, in larger epics, and across release versions.

The screenshot shows the JIRA Agile interface for a sprint named "EPM-HRM Sprint planning Tanya". The top navigation bar includes "Backlog", "Active sprints", "Reports", "Board", and "View in Tempo". Below the navigation, there are "QUICK FILTERS" for "Only My Issues" and "Recently Updated". The main area is divided into "VERSIONS" (Epm-Hrm1, Copernicus-1.4, Copernicus-1.5, Copernicus-1.6) and "EPICS" (Copernicus features, New Projects joining PMMP, ERR Dashboard, RM Platform Dashboard, Attribution Forecast Dashboard, RMAN vs EPMH projects, RU - EPMH roll out, HR Operations, JIRA trainings, EPM-HRM KB project support, Issues without epics). The "Custom workflows (30.03-10.04)" section shows a list of issues with their titles, assignees, and version labels. A "Backlog" section at the bottom shows 19 issues, with one issue highlighted: "EPM-HRM-1572 users cannot delete tasks related to KPI (risk of cheating)".

The screenshot shows the JIRA Agile interface for the "EPM-HRM Sprint planning Tanya" backlog. The top navigation bar includes "Backlog", "Active sprints", "Reports", "Board", and "View in Tempo". Below the navigation, there are "QUICK FILTERS" for "Only My Issues" and "Recently Updated". The main area is divided into "To Do", "In Progress", and "Done" columns. The "To Do" column contains several issues, including "EPM-HRM-1932 Custom Adaptation workflow implementation in JIRA", "EPM-HRM-1951 Investigate the possibility and to implement custom adaptation workflow in JIRA", "EPM-HRM-1955 Custom Exit management workflow implementation in JIRA", and "EPM-HRM-1956 Investigate the possibility to create custom workflow for Exit Management process". The "In Progress" column contains "EPM-HRM-1737 block the possibility to use any of EPMH projects for direct costs in CTC", "EPM-HRM-1801 Include EPMA-CMS (Dobrodel) unit into PMMP", "EPM-HRM-1725 Upgrade EPM-HRM wiki", and "EPM-HRM-1494 Jira Basic for Internal Mobility". The "Done" column contains "EPM-HRM-1894 Create announcement letter for global rollout", "EPM-HRM-1743 EPMH-LXD project set up", and "EPM-HRM-1494 Jira Basic for Internal Mobility".
