Spring has come. The snow
began to melt. The forest
animals rejoiced in the sun.

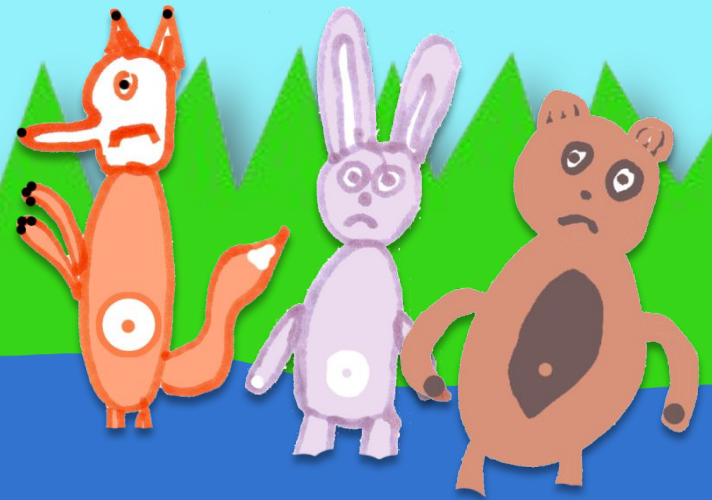

Once in the forest came
the tourists for a walk,
they have fun and they left
a lot of garbage.

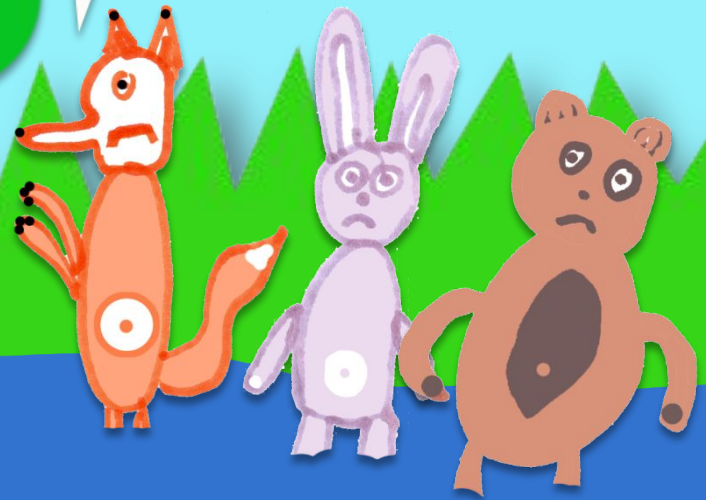

Trash blocked the road for
melting the snow. The
flood came, and animals
were in danger.

But luckily,
animals have
friends.

Help us!
We are in danger!
Help us clean up
the dam!

They helped the
animals to clean up all
the trash.

And now all the people know
that they should care about
nature because it is wealth.
