MAXIMIANVS

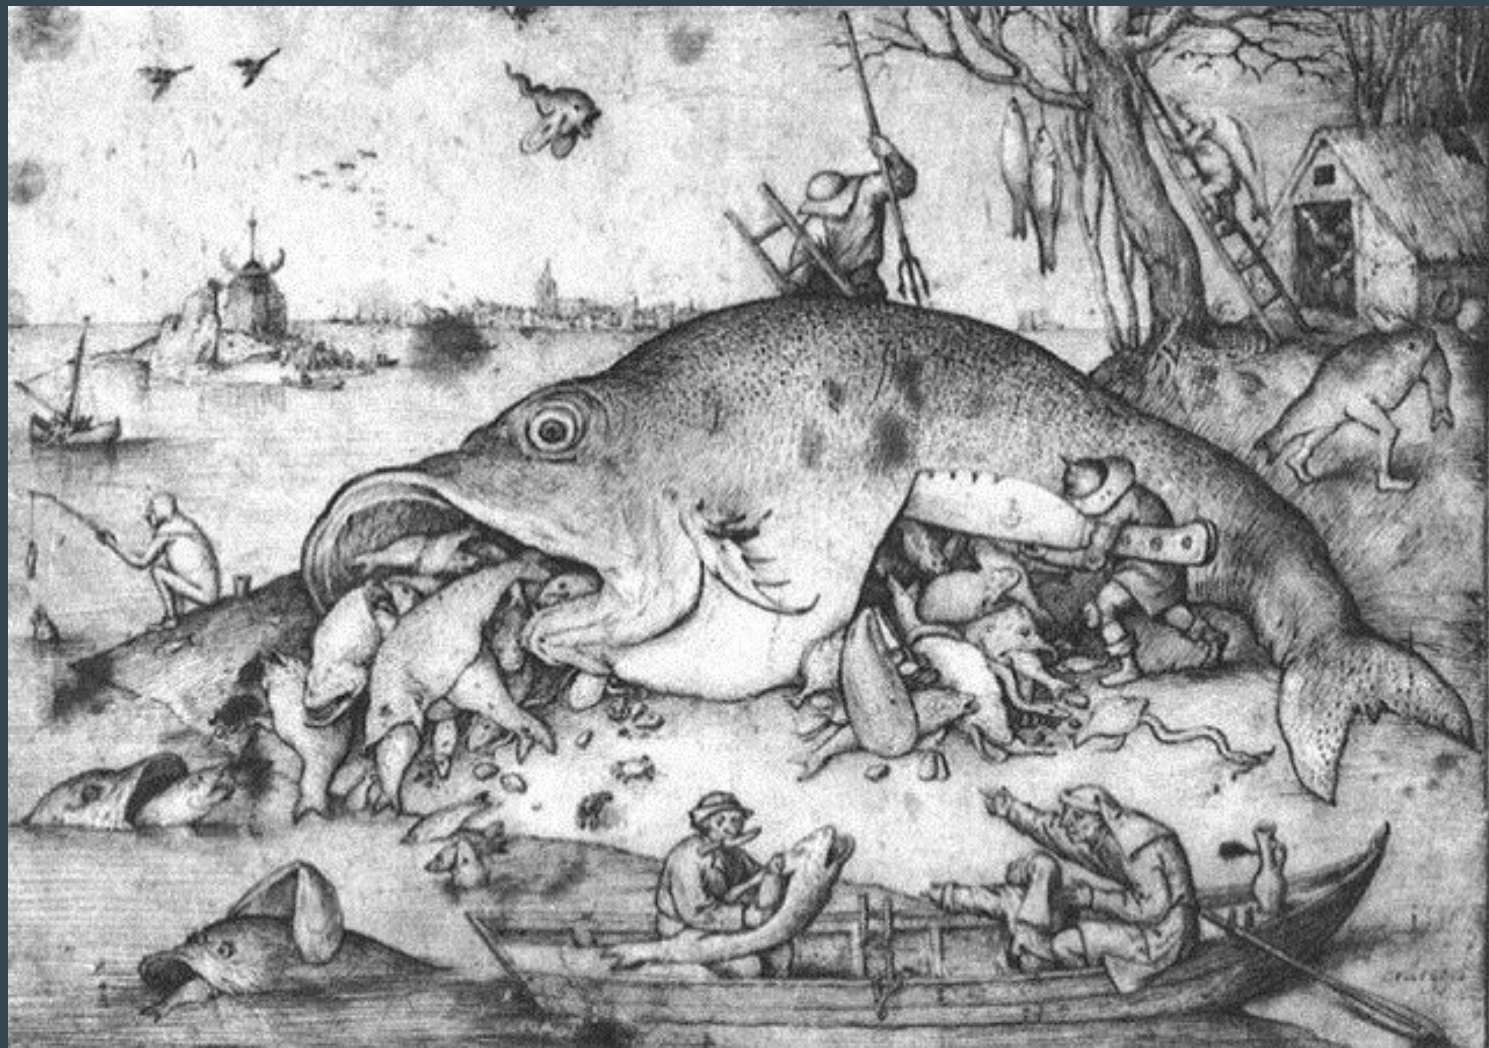

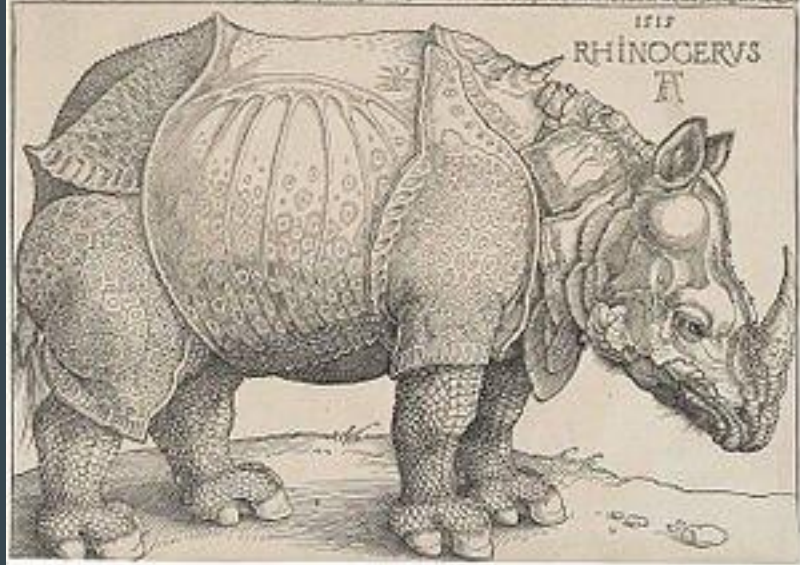

This figure represents the Rhinoceros, as it is commonly known in the East. It is a very large animal, and is found in the mountains of the East Indies, particularly in the island of Sumatra. It is a very fierce animal, and is very destructive to the crops of the country. It is also very voracious, and will eat any kind of food that it can find. It is a very slow animal, and is very difficult to hunt. It is a very valuable animal, and is much prized for its skin and horns. The horns are used for many purposes, and are very valuable in the East. The skin is used for many purposes, and is very valuable in the East.
