

HOW TO REDUCE A TRAFFIC ON SAINT-PETERSBURG STREETS

Work was made by Artyom Alexeev,
Azim Bakhodurov and Igor Malchevsky

THE PROBLEM OF TRAFFIC

The roads in Saint-Petersburg are heavily loaded. This is the most important problem.

This is due to the large number of cars and bad roads.

WHAT HAS BEEN DONE?

The city authorities build new roads, which go around the city, new overground crosswalks which will provide an opportunity to remove traffic lights.

OUR IDEAS

-It is necessary to remove public transport

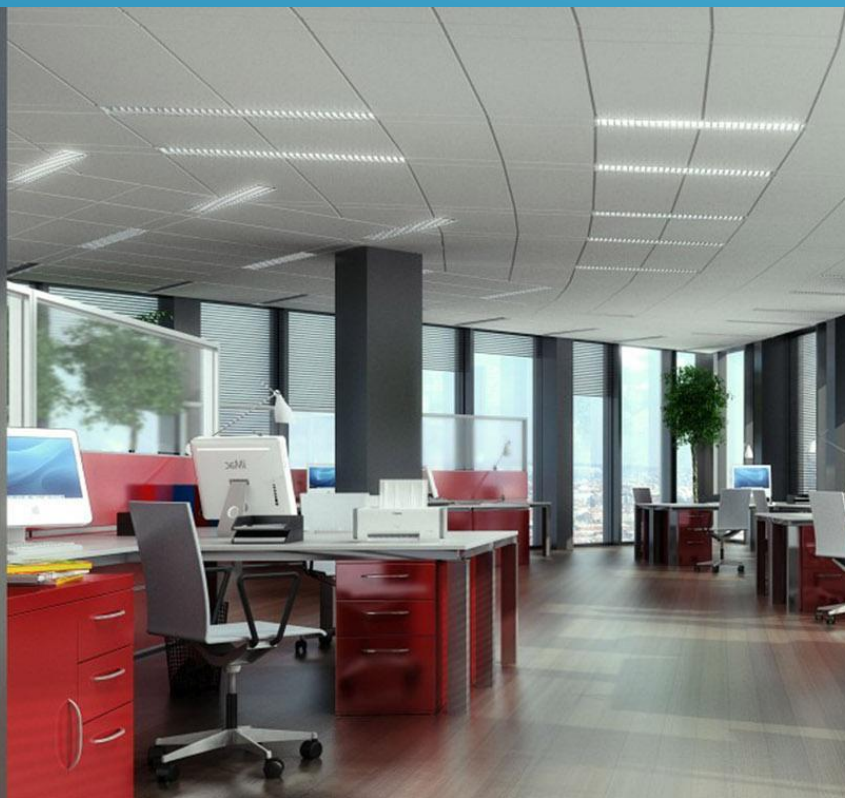

OUR IDEAS

-Increase bicycle lines

OUR IDEAS

Reduce number of offices
