

your HEART Goes OUT TO
someone.

One's heart stood still.

To take smth. to heart

To pluck up heart

The irresistible power of love.

Love deeply and passionately, that even the heart sinks with fright. Your heart may be broken and you don't need to take everything to heart, but this is the only way to experience life fully and gather your spirit. Love is one of the fundamental and common themes in the world of culture and art. The debate about love and its analysis as a phenomenon goes back to the old systems of philosophy and literary monuments known to man. Many books, musical works and masterpieces of art have been devoted to this topic. But no one could reveal the theme of love.

Love ... We see what kind of person we communicate with him ... Immediately or after a while we understand that this is the person we have been looking for all our life ... We know this person so well, and at the same time we we feel that there is so much unsolved in it.

The words "I love you" always sound like the first time. The hours spent with that person fly by like seconds. We fall asleep and wake up, imagining the eyes of our dear person, his warm lips, the scent of his body, gentle fingers sliding over the skin. His voice drives us everywhere, we fall asleep with the words of our beloved "Sweet dreams to you, my dear!" and wake up with "Good morning, my sun!". We are looking for our favorite image on the street in a crowd of people. We connect our life with an invisible thread.
