

How to Shop Properly?

1) Shop with a list.

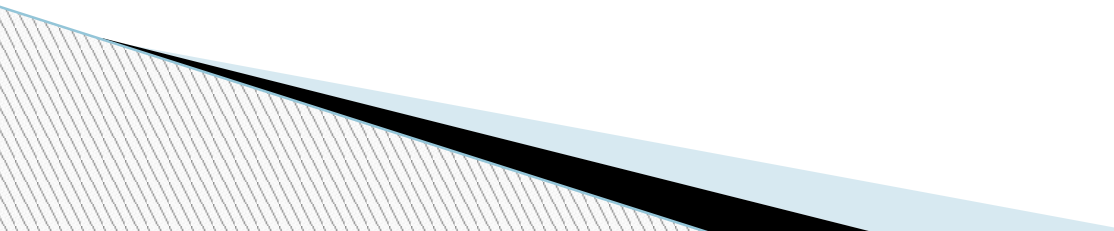

This is my number one tip for good reason. Always need to buy only the most necessary.

2) Pay in cash

The use of credit cards entails unforeseen expenses.

4) Set a timeframe.

Don't allow yourself to meander around a shopping centre in an aimless fashion. Many people use shopping in a lollabout fashion, whiling away an afternoon in their favourite mall.

5)Remember that the sales person is there to sell to you! No matter how friendly or pleasant a sales person is, here is the fact you cannot avoid: they're in it for the sale. Yes, they may care that you walk out only with items that suit you and that you will use. But they want you to walk out with something.

Thank you for attention!
