

Butterfly Day

<https://vk.com/growenglish>

# A butterfly is an insect.

(dragonfly, ladybird UK / ladybug US, bug/ beetle, fly, wasp, grasshopper, ant, spider)

Its body is divided into three parts: head, thorax /'θɔ:.ræks/ and abdomen /'æb.də.mən/.

A butterfly has four wings...

...three pairs of thin legs,

... and one large eye on each side of its head.

Like all other insects, a butterfly has two feelers, called antennae /æn'tɛn i/.

A butterfly cannot bite or chew. It sips water and nectar from flowers through a long sucking tube.

There are four stages in the life of a butterfly.

They are: the egg,

...the caterpillar,

G

...the resting stage (in a cocoon /kə'kʊn/ ),

...and the adult stage – a beautiful butterfly.
