WHAT ARE DIGITAL DOUBLE CAPABLE OF?

Digital doubles rapidly accelerate the sales funnel. They start a conversation with thousands, tens of thousands and hundreds of thousands of people in social media, make acquaintance, talk and offer cooperation in a subtle way.

THEY CAN:

- Look for investors for your project
- Sell or buy goods or services
- Find employees or business partners
- Motivate your team to be always in touch
- Talk to people who contact you before engaging you personally
- They never sleep, never take a leave, never ask for a raise: while you sleep, rest, socialize, they work and make money for you

DATA MINING: HOW IT WORKS

Every network participant (miner) can connect any of their social media and the social media of the immediate environment to the AI server.

We will create the digital doubles of your identity who will add friends and talk to tens of thousands of users across the world.

An agent network of 100,000 miners can control up to 1,000,000,000 people around the world.

All agent miners unite into a megabrain under the control of our artificial intelligence.

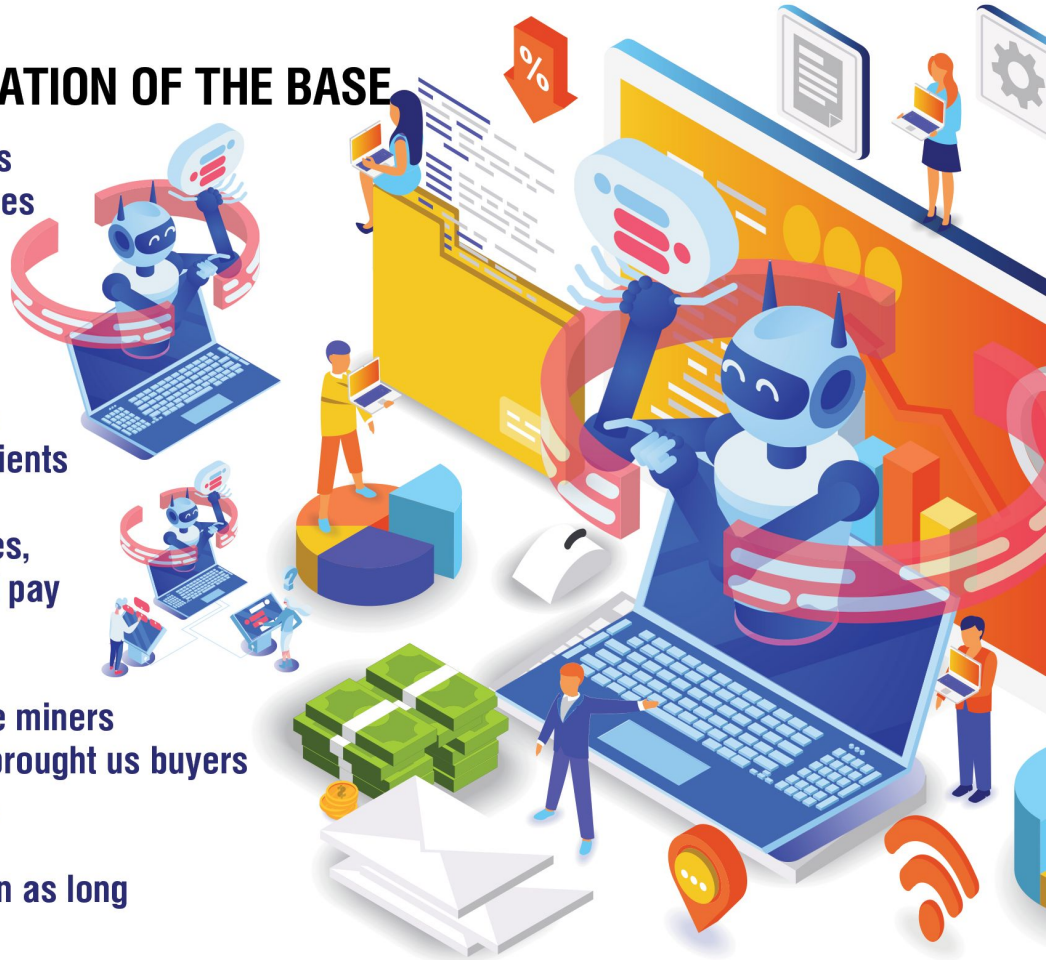

RESIDUAL INCOME FROM THE MONETIZATION OF THE BASE

We offer our digital products and the products and services of our partners to users across the world.

Under the control of our megabrain, hundreds of millions of prospective clients with one click learn about our products, goods, services, and become our clients and pay us money.

We share profits with all the miners – with those accounts that brought us buyers and with all other accounts.

Every miner will always earn as long as they stay in the project.

SALE OF ANALYTICAL DATA

Social media contain billions of data, which increase every day. Profit organizations, researchers, advertisers, startups take interest in statistics about people's preferences, wishes, lifestyle, job and hobbies.

Social media sell that data packaged in an ad-view form without giving access to the source data, which they believe they own.

Our mining farms set up by our digital doubles collect all the necessary information about users.

Miners receive part of the profits from each commercial sale of analytical data across all social media in the world.

Can connect social media of their family

NODE

Manages 100,000 people
The miner buys the license \$100, \$150 or \$250

SALES INFORMATION

- Sales
- Nodes are connected to our AI server
 - 100,000 nodes manage 1,000,000,000 people
 - Each sale goes from the AI server to all nodes
 - Profit from sales:
 - 80% is received by nodes and miners who brought the buyers
 - 20% is received by remaining nodes even if they haven't sold anything
 - This way everyone receives a profit
 - Miners receive a percentage-based commission from each sale while they are in the data mining system
 - The bigger the node (more social media and more accounts), the more interesting and lively content in social media, the more interesting people are added to the friend list.
