

THE LONDON EYE

WE BEGIN

❖ The London Eye is one of the largest wheel in the world, located in the London borough of Lambeth on the south shore from a height of 135 meters (about 45 floors) overlook almost the entire city. Ferris smeyny project spouses architects David Marks and Julia Barfield. Implementation of the project to life took six years. The London Eye has 32 fully enclosed and air-conditioned cabins for passengers capsules made in the shape of an egg.

❖ Capsules symbolize the 32 suburban London. Each 10-ton capsule can accommodate up to 25 passengers. The wheel is rotated at a constant rate of 26.4 centimeters per second (about 0.9 km per hour) for one revolution takes about 30 minutes. If necessary, take the "board" passengers wheel stops - speed allows passengers to get on and off at ground level. Wheel stops only to people with disabilities and the elderly can safely landing.
