

Hello, guys! My name's Pollyanna and I am here to live with my aunt Polly. This attic is my room now. But I am glad. This was my mum's favourite room. Look at that beautiful blue pillow..... Oh...

*Key: What do you need to study all these subjects?*

Match the words with the definitions.

a species	ten years
a decade	the warming of the world and changes in weather
deforestation	a group of plants or animals that are the same and can reproduce
a pesticide	plants which are originally from the place where they're growing
climate change	a chemical that can kill insects and other living things
to go extinct	the way the living things in a particular area eat each other
a food web	cutting or burning down trees in a particular area
native plants	when a type of animal or plant doesn't exist any more

Watch the video. Put the words in the correct order.

- a. ~~insect species~~ ~~There are~~ ~~different~~ ~~in the world.~~ ~~at least 30 million~~  
There are at least 30 million different insect species in the world.
- b. in the world a lot more than All the insects all the humans. weigh
- c. insect populations the world's by 41 per cent. Over the past decade have reduced
- d. over the next could go extinct of insect species few decades. Forty per cent
- e. food webs. Insects important are for
- f. a world insects. without we wouldn't have Ben thinks
- g. our environment. important it's Ben says to take care of
- h. help native plants. You can by planting insects

Perfect! So, where can we find an insect in this room?

Cool! Rainbow is a code to mum's hiding place. It can be on the windowsill

*Mon, August, 27*

*Today my sisters are really annoying.  
What do they want? I am crazy about  
the moor and the hill. How can I stop  
running there? And, by the way, I  
met him there. I should hide my diary*

so
