

Inventions that are no longer in use

Why some inventions are becoming a thing of the past?

- Invention of a more convenient analog
- Stopping using because of uselessness
- Facts about non-safety or unreliability

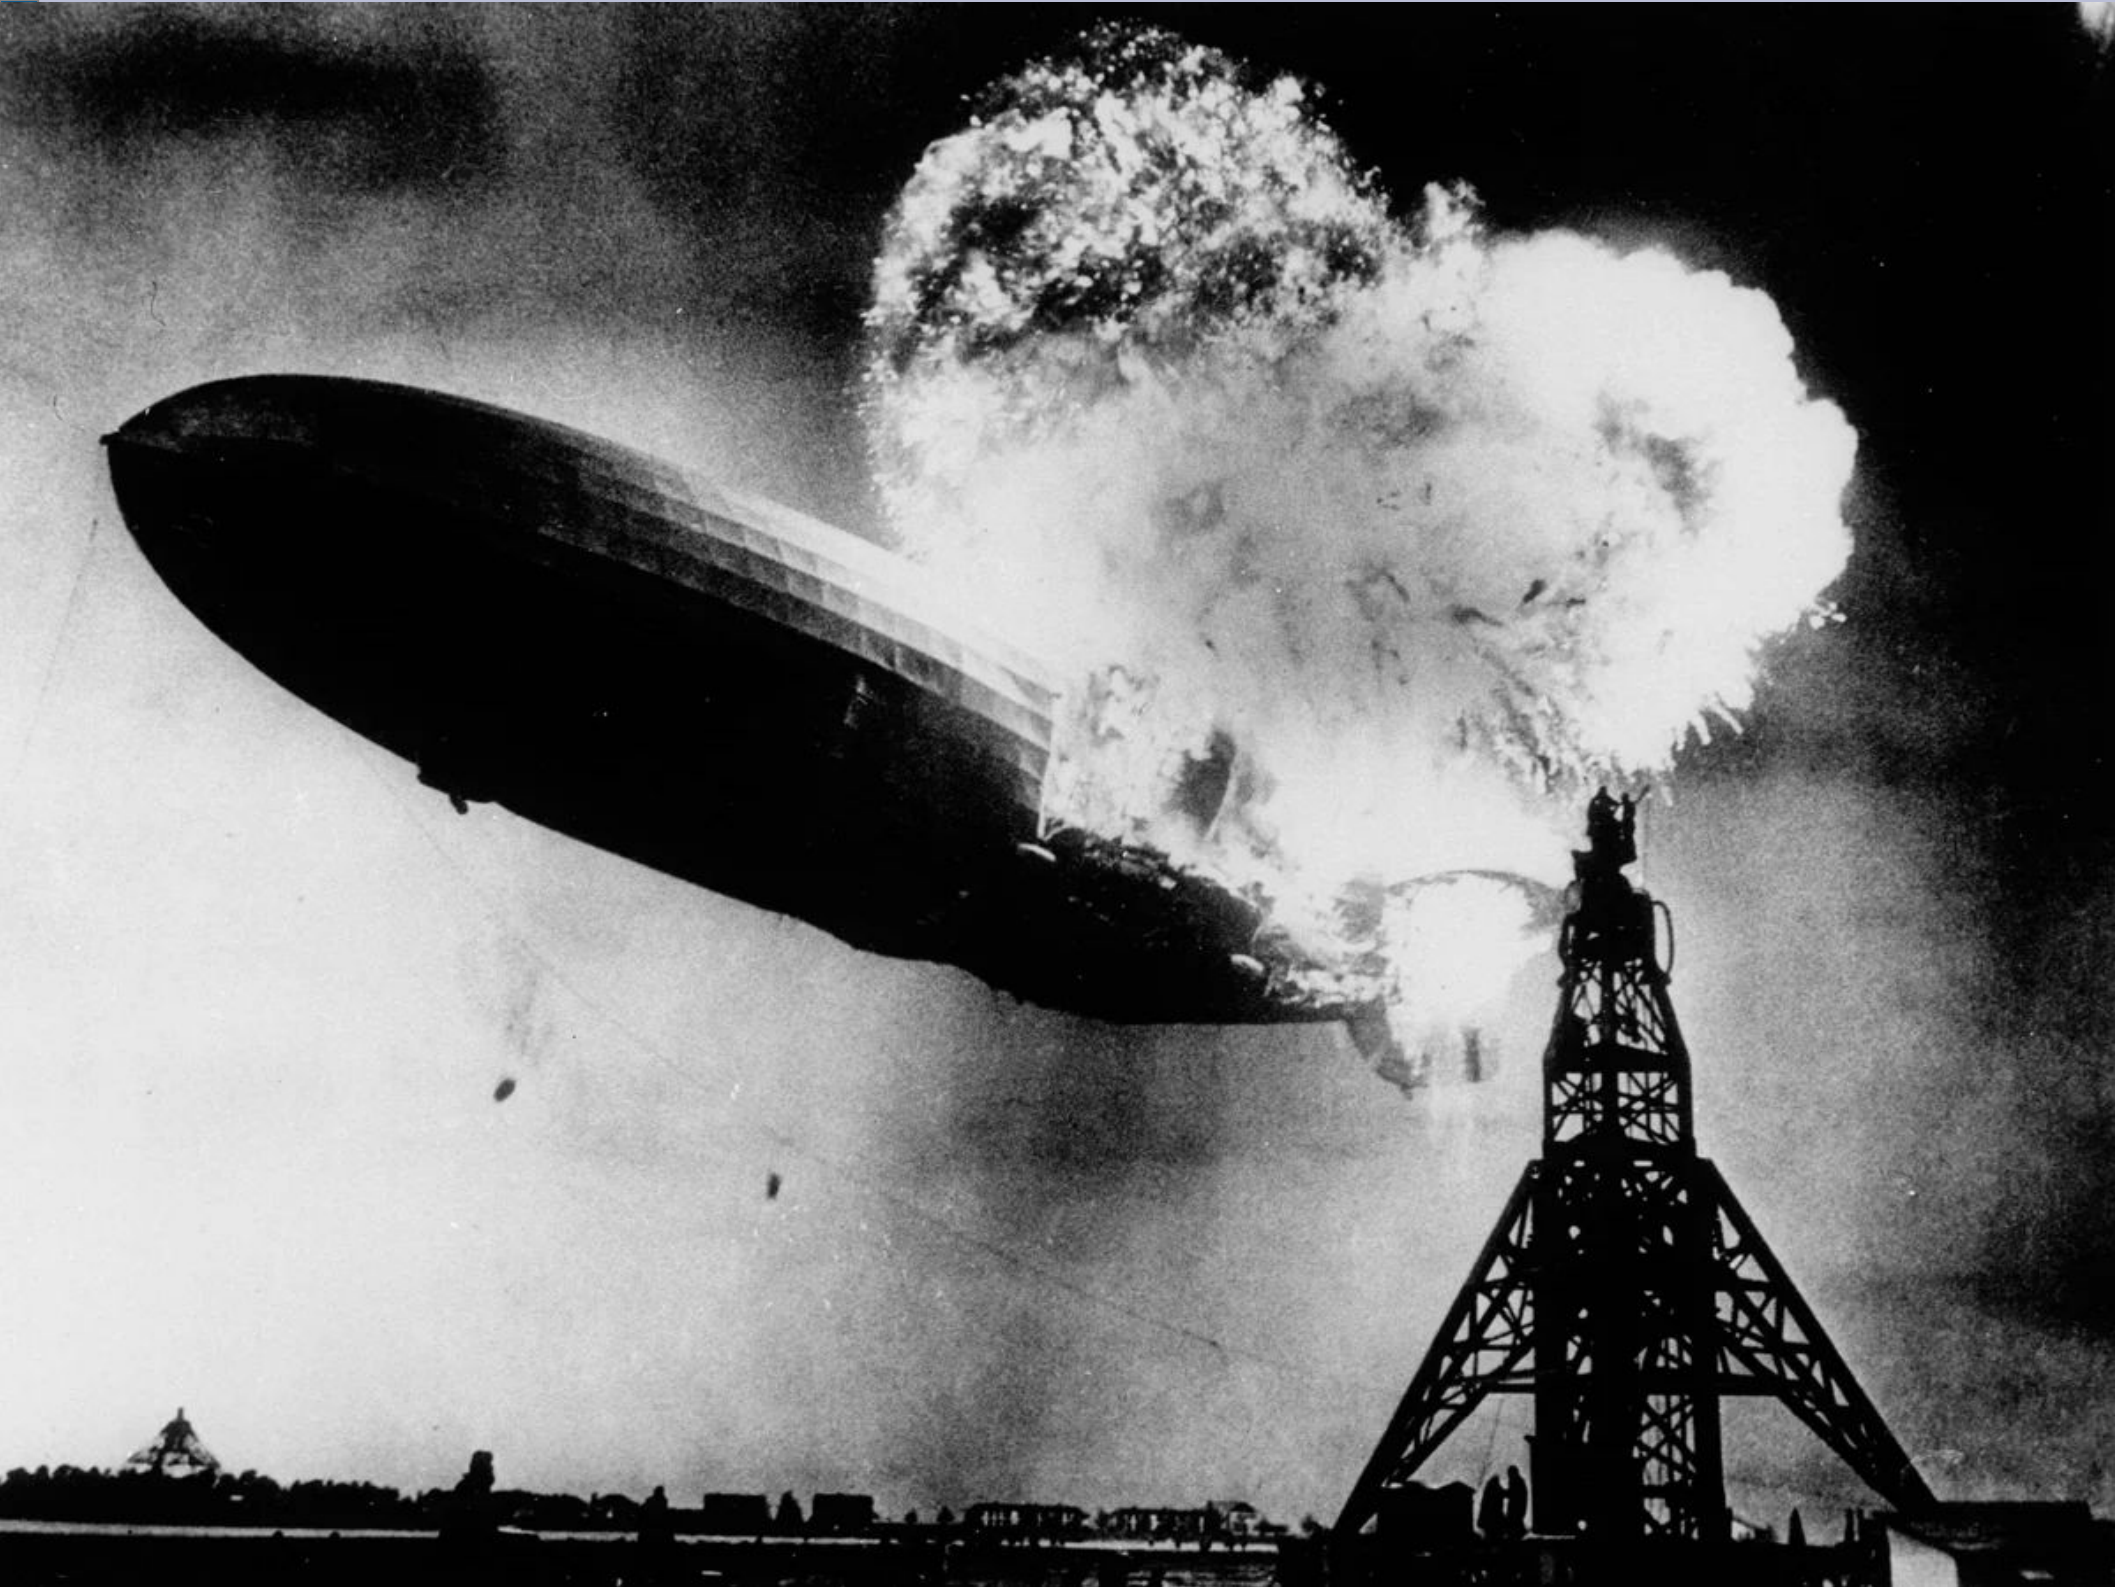

Airship

- Was invented at the beginning of 20-th century
- Used for cargo transporting, as an air transport and for military purposes
- Nowadays is using only for marketing

Rio de Janeiro - a view from the bay

Typewriter

- Was invented at the beginning of 19-th century
- Came a long way to become convenient for writers
- Modern keyboards have a similar key placement (QWERTY design)

VHS Videotape

- Was invented in 1976
- Became popular because of cheapness, reliability and the duration of recording
- Users were able to watch films, record TV-programs, record their moments of life using videocamera
