

Zoo Lover's Day

Here is where your presentation begins

Contents of this template

Here's what you'll find in this **Slidesgo** template:

1. A slide structure based on a multi-purpose presentation, which you can easily adapt to your needs. For more info on how to edit the template, please visit **Slidesgo School** or read our **FAQs**.
2. To view this template with the correct fonts in ppt format, download and install on your computer the **fonts that we have used**. You can learn how to download and install fonts **here**.
3. An assortment of graphic resources that are suitable for use in the presentation can be found in the **alternative resources slide**.
4. A **thanks slide**, which you must keep so that proper credits for our design are given.
5. A **resources slide**, where you'll find links to all the elements used in the template.
6. **Instructions for use**.
7. Final slides with:
 - The **fonts and colors** used in the template.
 - A **selection of illustrations**. You can also customize and animate them as you wish with the online editor. Visit **Storyset** to find more.
 - More **infographic resources**, whose size and color can be edited.
 - Sets of **customizable icons** of the following themes: general, business, avatar, creative process, education, help & support, medical, nature, performing arts, SEO & marketing, and teamwork.

You can delete this slide when you're done editing the presentation.

Table of contents

01

What is a zoo?

You can describe the topic of the section here

02

Types of zoos

You can describe the topic of the section here

03

Animals we find

You can describe the topic of the section here

04

Animal care

You can describe the topic of the section here

“This is a quote, words full of wisdom
that someone important said and
can make the reader get inspired.”

–Someone Famous

What is a zoo?

You can enter a subtitle here if
you need it

What is a zoo?

Do you know what helps you make your point crystal clear?

Lists like this one:

- They're simple
- You can organize your ideas clearly
- You'll never forget to buy milk!

And the most important thing: the audience won't miss the point of your presentation

Introduction

You can give a brief description of the topic you want to talk about here. For example, if you want to talk about Mercury, you can say that it's the smallest planet in the entire Solar System

Whoa!

This can be the part of the presentation where you introduce yourself, write your email...

Zoo purposes

Entertainment

Mercury is the closest planet to the Sun and the smallest one in the Solar System. This planet's name has nothing to do with the liquid metal

Conservation

Venus has a beautiful name and is the second planet from the Sun. It's hot and is the second-brightest natural object in the night sky

A picture always reinforces the concept

Images reveal large amounts of data, so
remember: use an image instead of a
long text. Your audience will appreciate it

Awesome words

What you can and can't do at the zoo

You can...

- Write what you can do here
- Write what you can do here
- Write what you can do here
- Write what you can do here
- Write what you can do here
- Write what you can do here
- Write what you can do here

You can't....

- Write what you can't do here
- Write what you can't do here
- Write what you can't do here
- Write what you can't do here
- Write what you can't do here
- Write what you can't do here
- Write what you can't do here

An illustration of two ostriches standing in a savanna landscape. The ostrich on the left is facing right, while the one on the right is facing left. They have dark brown feathers and long pink legs. The background features a light blue sky with white clouds and a large yellow sun. The ground is a mix of yellow and green grass.

02

Types of zoo

You can enter a subtitle here if
you need it

Zoo types

Safari park

Mercury is the closest planet to the Sun of them all

Petting zoo

Jupiter is the biggest planet of them all

Roadside zoo

Venus is the second planet from the Sun

Aquaria

Saturn is composed of hydrogen and helium

Zoo types differences

	Aquaria	Safari	Petting
Animal	Mercury is the smallest planet	Venus has a beautiful name but is very hot	The Sun is the big star we orbit
Shelters	Jupiter is the biggest planet of them all	Neptune is very far from the Sun	Despite being red, Mars is a cold place
Animal care	Saturn is the planet with many rings	The Earth is where we all live	Mercury is the smallest planet

Popularity of different zoos

03

Animals we find

You can enter a subtitle here if you need it

Some of the animals you can find

Mercury

Mercury is the closest planet of all to the Sun

Venus

Venus is the second planet from the Sun

Mars

Despite being red, Mars is actually a cold place

Jupiter

Jupiter is the biggest planet of them all

Saturn

Saturn is composed of hydrogen and helium

Neptune

Neptune is the farthest planet from the Sun

Animal kingdoms

Mammals

Mercury is the closest planet to the Sun

Birds

Venus is the second planet from the Sun

Fishes

Despite being red, Mars is actually a cold place

Amphibians

Jupiter is the biggest planet of them all

Reptiles

Neptune is the farthest planet from the Sun

Zoo zones

Mercury

Mercury is the closest planet of all to the Sun

Venus

Venus is the second planet from the Sun

Jupiter

Jupiter is the biggest planet of them all

Saturn

Saturn is composed of hydrogen and helium

Where do they come from?

Mars

Despite being red, Mars is actually a cold place

Neptune

Neptune is the farthest planet from the Sun

Venus

Venus is the second planet from the Sun

Saturn

Saturn is composed of hydrogen and helium

04

Animal care

You can enter a subtitle here if
you need it

How do we take care of the animals?

Saturn

Saturn is composed of hydrogen and helium

Neptune

Neptune is the farthest planet from the Sun

01

Venus

Venus is the second planet from the Sun

02

03

Mars

Despite being red, Mars is actually a cold place

04

Customer profile

Age

Gender

Psychographics

Venus has a beautiful name but it's very hot, hotter than Mercury
