

The image shows a top-down view of numerous discarded cigarette butts and ash scattered across a dark, textured surface. The butts are in various stages of being smoked, with some showing the white filter and others just the yellowish-brown end. The ash is a fine, brownish powder, and there are also some larger clumps of tobacco leaves. The overall scene is one of waste and the aftermath of smoking.

Вред курения.

Определение

Курение табака

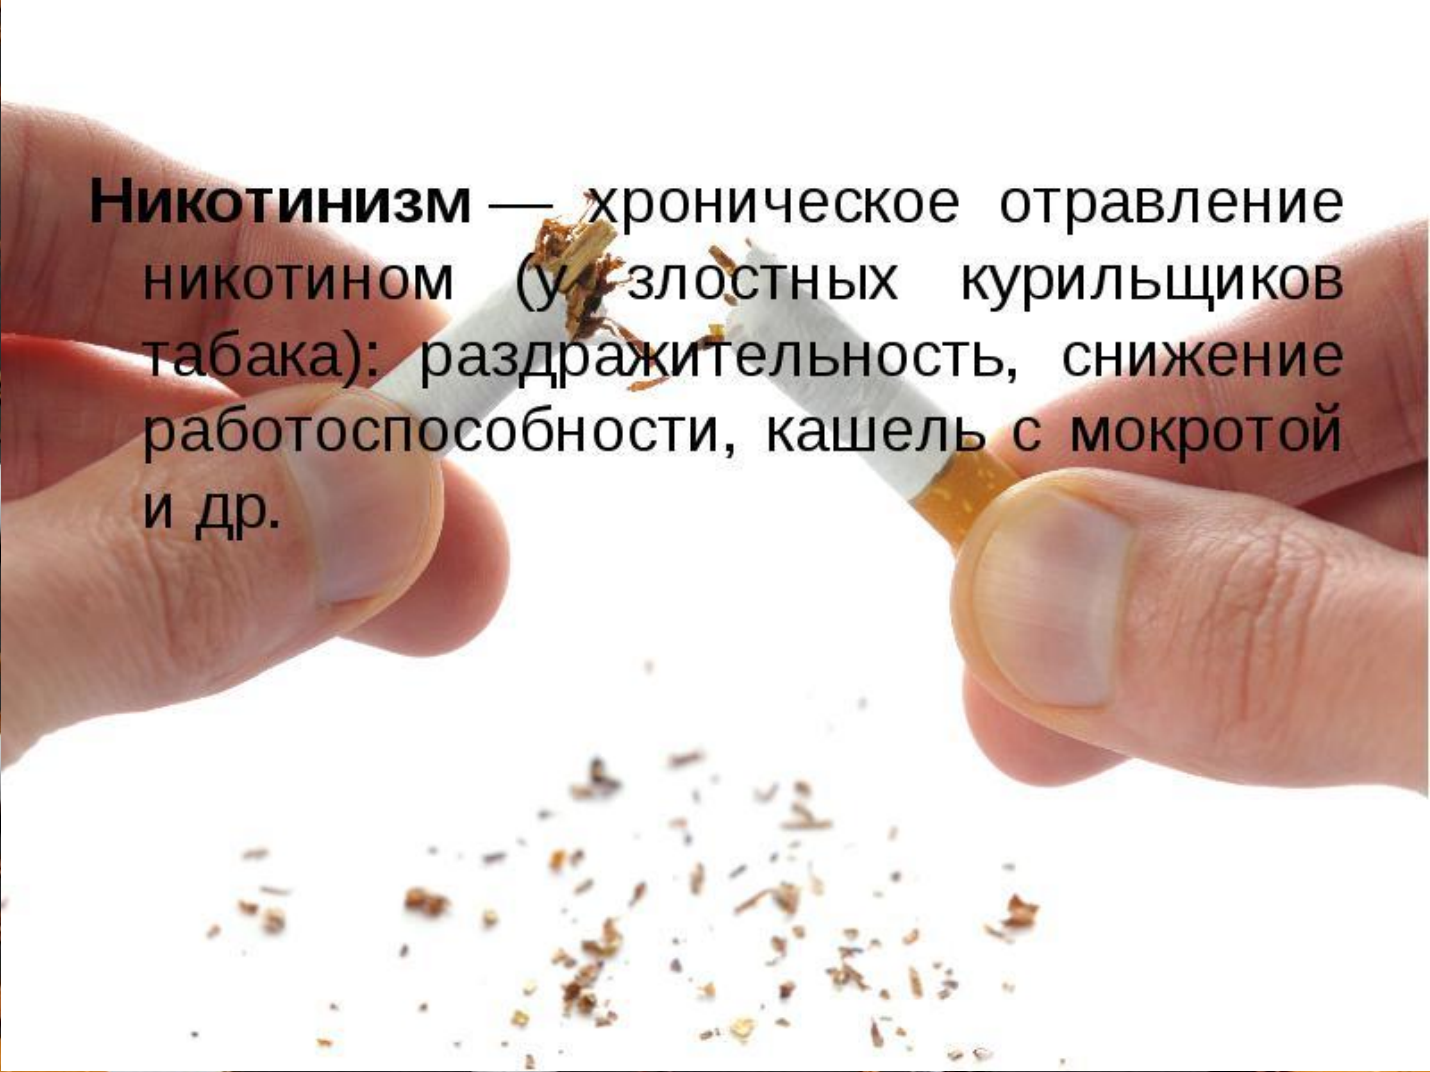

*Курение табака - фактор риска
развития и прогрессирования
заболеваний органов дыхания*

Никотин

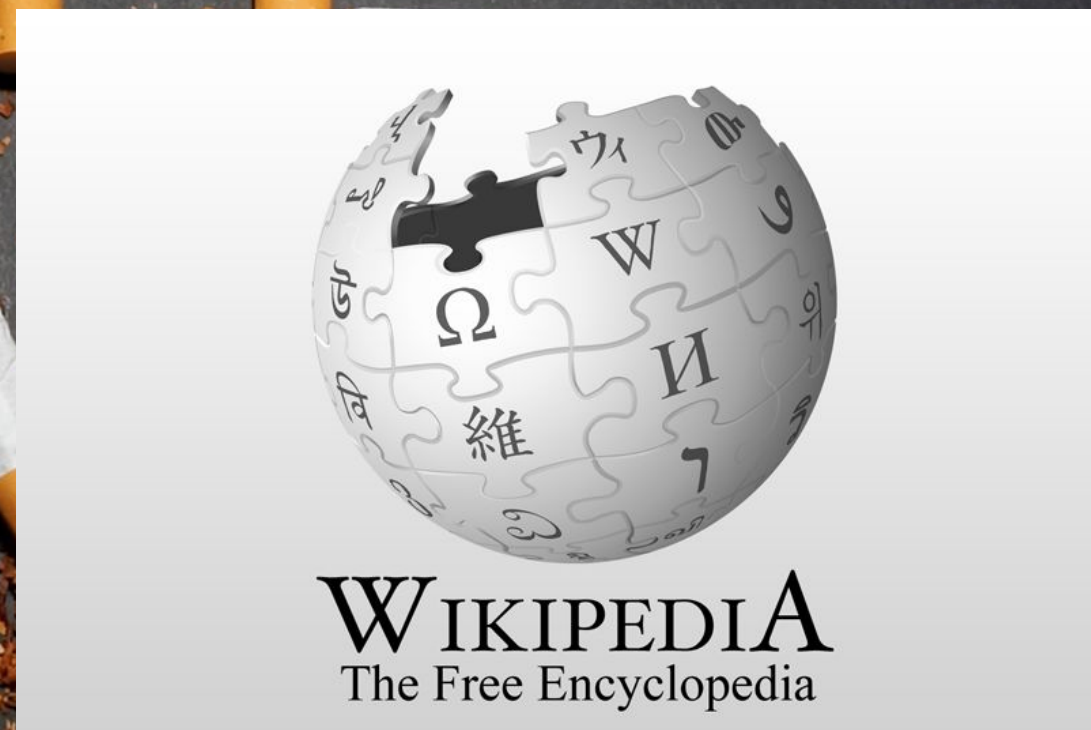

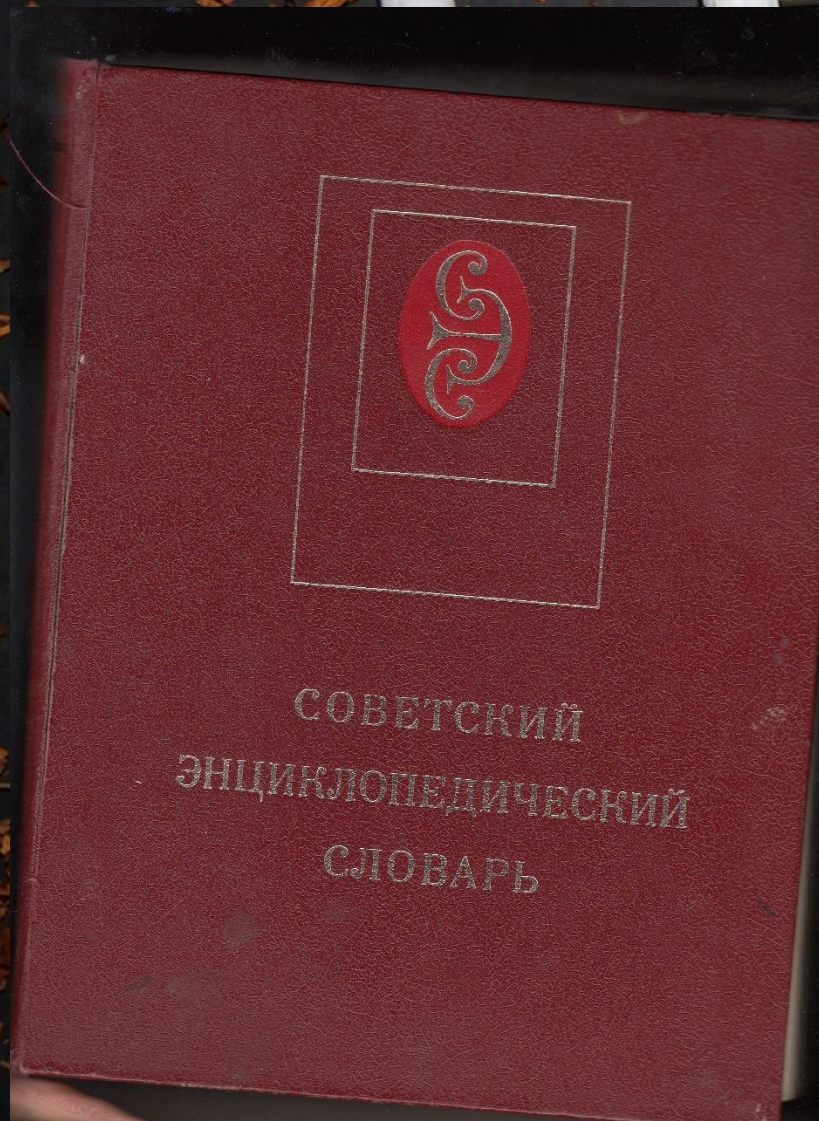

НИКОТИНИЗМ

A close-up photograph of a hand holding a lit cigarette. The cigarette is lit, with a small amount of ash and smoke visible. The hand is positioned in the center of the frame. Overlaid on the image is a white rectangular text box containing a definition of nicotine addiction. The background of the entire image is dark and scattered with cigarette ash and discarded cigarette butts.

Никотинизм — хроническое отравление никотином (у злобных курильщиков табака): раздражительность, снижение работоспособности, кашель с мокротой и др.
