

A visual equation where two identical blue sailboats are added together to equal the number 15. Each sailboat consists of a blue trapezoidal hull with a white circular window outlined in orange, a vertical blue mast, and two curved blue sails. The plus sign and equals sign are also blue, and the number 15 is in a large, bold black font.

$$2 \text{ sailboats} + 1 \text{ sailboat} = 15$$

A visual equation where two identical blue sailboats are added together to equal the number 13. Each sailboat consists of a blue trapezoidal hull with a white circular window outlined in orange, a vertical blue mast, and two curved blue sails. The plus sign and equals sign are also blue, and the number 13 is in a large, bold black font.

$$1 + 1 = 13$$

A visual equation illustrating the concept of addition. It features two identical blue sailboats, each with a white circular window and a blue mast with two curved sails. A blue plus sign is positioned between the two sailboats. To the right of the second sailboat is a blue equals sign, followed by the number 14 in a large, bold, black font.

$$2 \text{ sailboats} + 1 \text{ sailboat} = 14$$

A visual equation where two identical sailboats are added together to equal the number 12. Each sailboat consists of a blue trapezoidal hull with a white circular window, a vertical blue mast, and a curved orange sail. The equation is represented as:  $2 \text{ sailboats} + 1 \text{ sailboat} = 12$ .

A visual equation where two identical sailboats are added together to equal the number 18. Each sailboat consists of a blue trapezoidal hull with a white circular window outlined in orange, a vertical blue mast, and a curved orange sail. The equation is presented as:  $2 \text{ sailboats} + 1 \text{ sailboat} = 18$ .

A visual equation showing two identical sailboats. Each sailboat has a blue hull with a white circle in the center, a yellow crescent sail, and a blue mast. The sailboats are separated by a blue plus sign. To the right of the second sailboat is a blue equals sign, followed by the number 17 in a large, bold, black font.

$$2 \text{ sailboats} + 2 \text{ sailboats} = 17$$

A visual equation where two identical sailboats are added together to equal the number 16. Each sailboat consists of a blue trapezoidal hull with a white circular window outlined in orange, a vertical blue mast, and a yellow crescent-shaped sail. The equation is presented as:  $2 \text{ sailboats} + 1 \text{ sailboat} = 16$ .

A visual equation where two identical sailboats are added together to equal the number 11. Each sailboat consists of a blue trapezoidal hull with a white circular window, a vertical blue mast, and a yellow crescent-shaped sail. The equation is represented as:  $1 \text{ sailboat} + 1 \text{ sailboat} = 11$ .
