## From the lab to the line of business

Enterprises need to move from ad-hoc experimentation with AI to enable everybody within the organization to use it to improve both operational efficiency and deliver business value thanks to true business apps.

IOSS gives you the opportunity to ensure the appropriate behavior in the valuation, creation, consumption and control of data and analytics. IOSS offers to business actors an agile and collaborative vision of data.

Schema : ideally this schema is native (because these words are important for our SEO)

And it will be on vertical for responsive
