

Future inventions

The project was prepared by: Metelichina V.O.

Egorov A.S.

Possible, but not necessary.

Armpit Fan “Airfander”

- Cooling and dryness of the armpits
- Developed in Japan
- Developed over the next few years

The Butt Cooler “RefrigerAsstor”

- Cool your burning butt
- Developed by the American company Nvidia
- Will be available in 2022

Freeze gun “Just for us”

- With the previous one
- For emergency use
- Will be available in 2025

It's possible and vital.

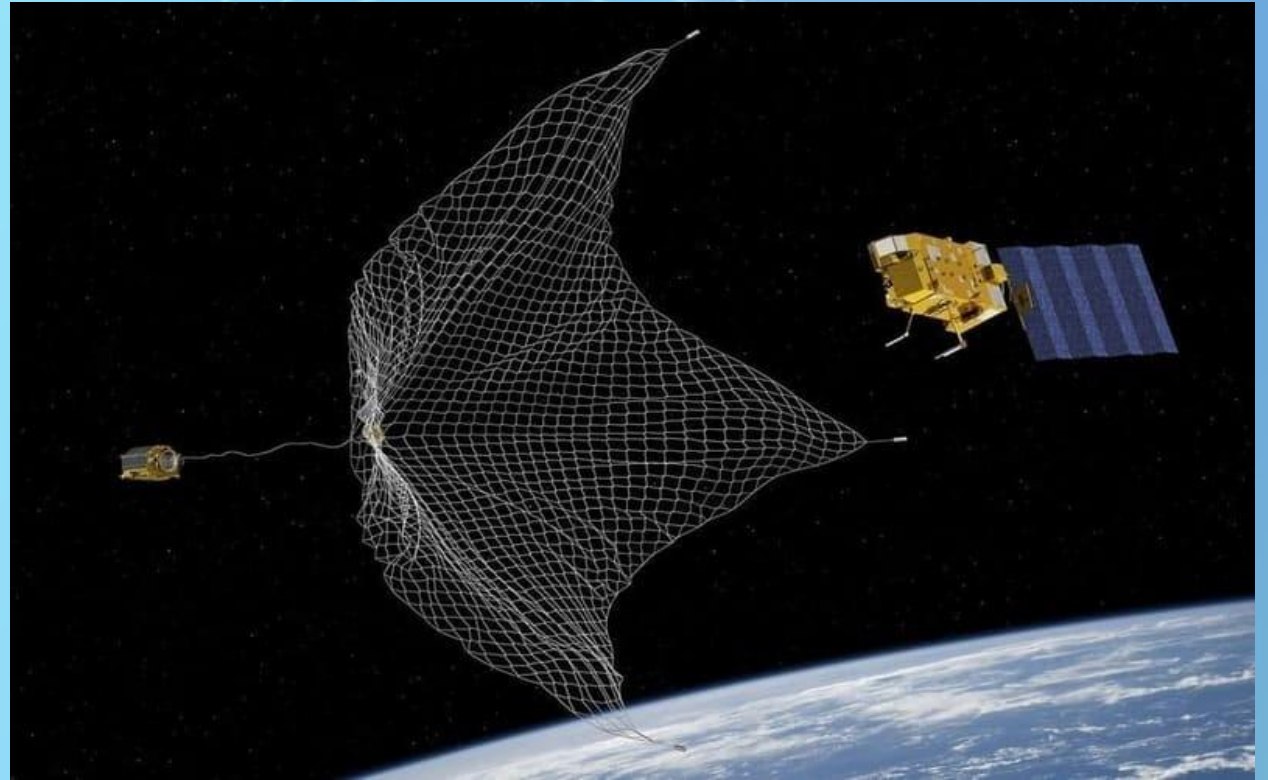

Auto-cleaning pet toilet “Fairy tail 0.1”

- Clean up your pet's feces
- Developed in America, Oregon
- Will be available this summer

The Space Trash Collector “Space Trasher”

- Collects various space wastes
- Manufactured in Korea
- Launch date is unknown

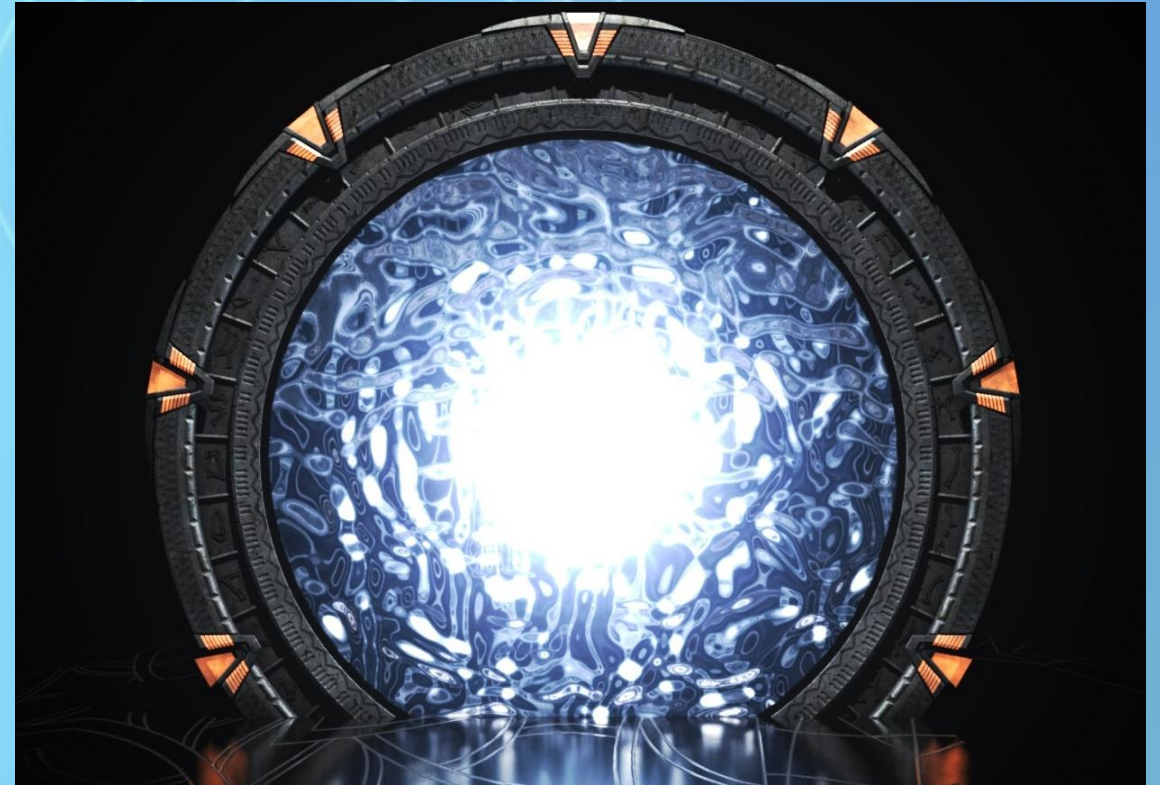

App from perverts “Anti-horny app”

- Removes intimate photos
- Developed in Chelyabinsk (SUSU)
- Will be available in 2035

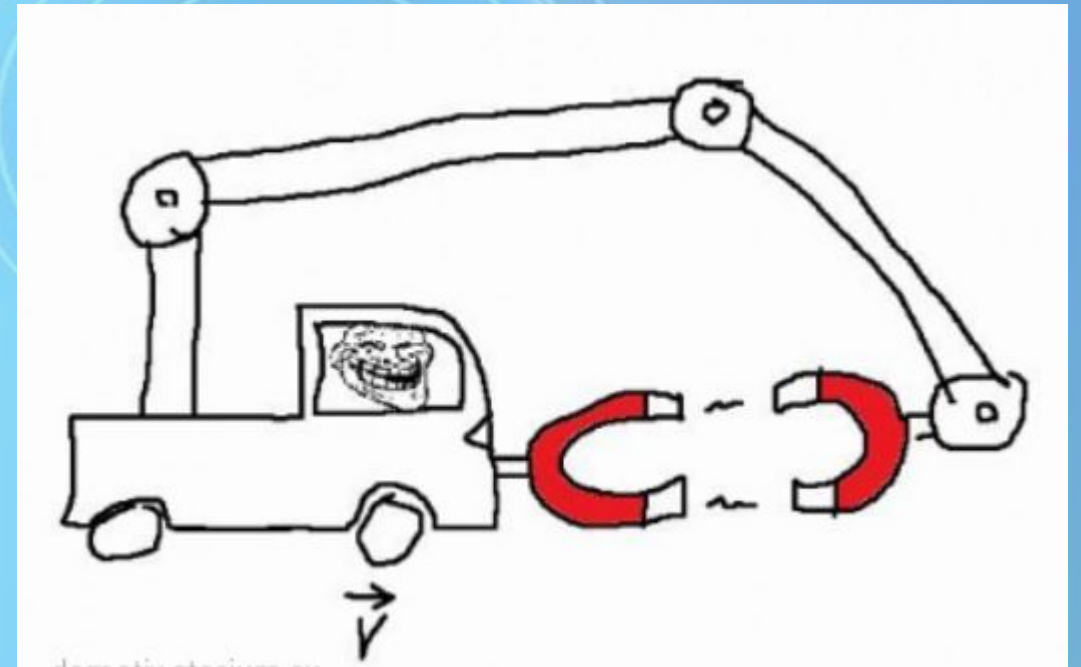

Impossible, but vital. Teleport “Interstellar”

- Move from one point to another
- Developed by many scientists
- Will be completed in the next 50 years

Perpetual motion machine “Perpetuum mobile”

- Doesn't need to be recharged
- Developed by leading scientists
- Release date is 2077

A time machine “ABOBA”

- Moving a person through time
- Implemented by many scientists
- Release date is 2069
