

How funny to study at school?

Pupil: Petrenko Victoria

I think that studying at school is very funny because there are a lot of pluses such as...

- Many new friends who will support you during the whole life

- Taking part in school activities

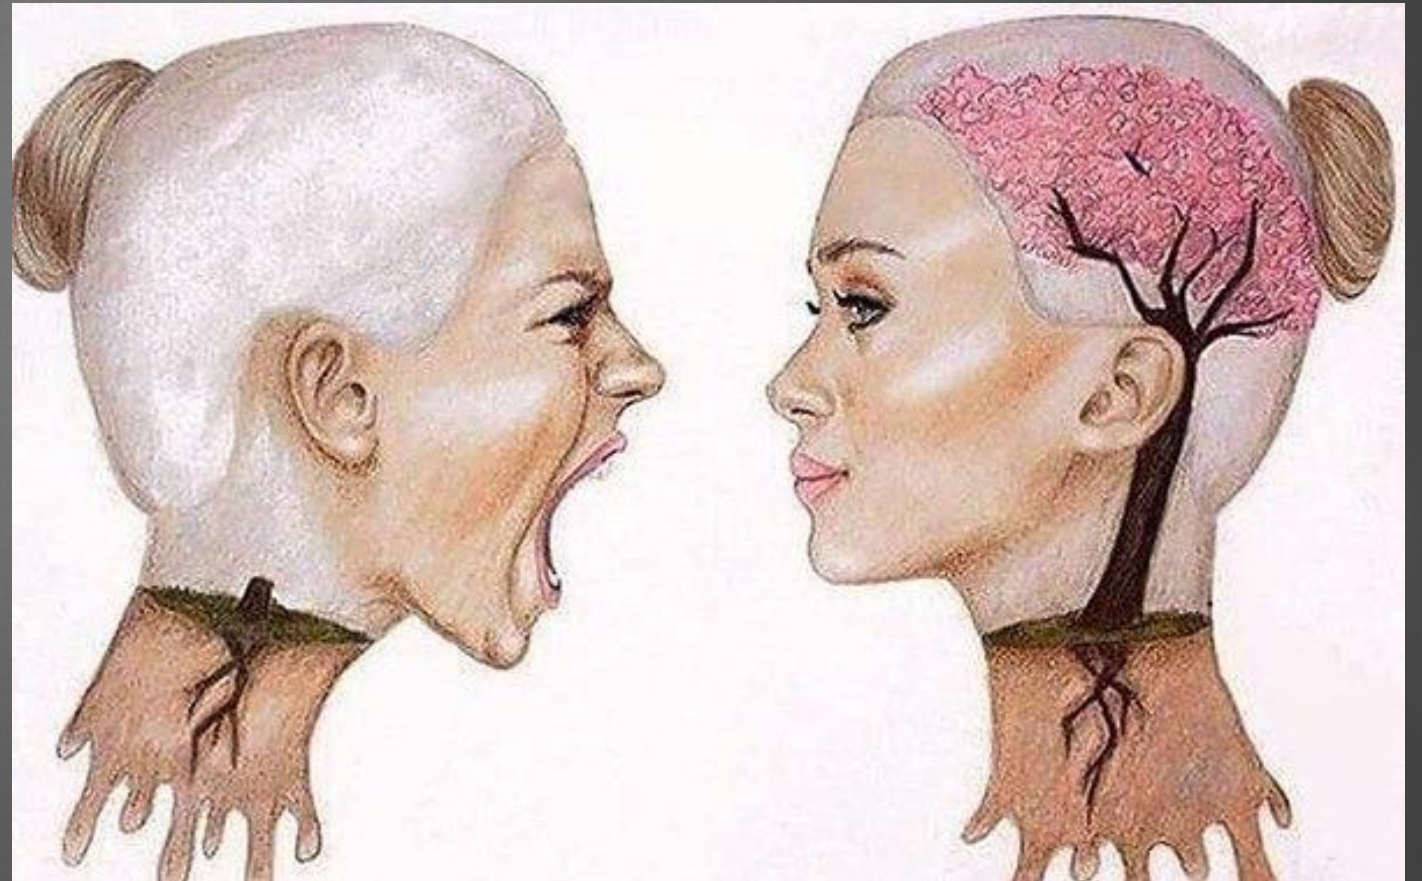

- Getting experience and knowledge

- Studying interesting subjects which can help you in future

- Development your mind and imagination

But there are some minuses...

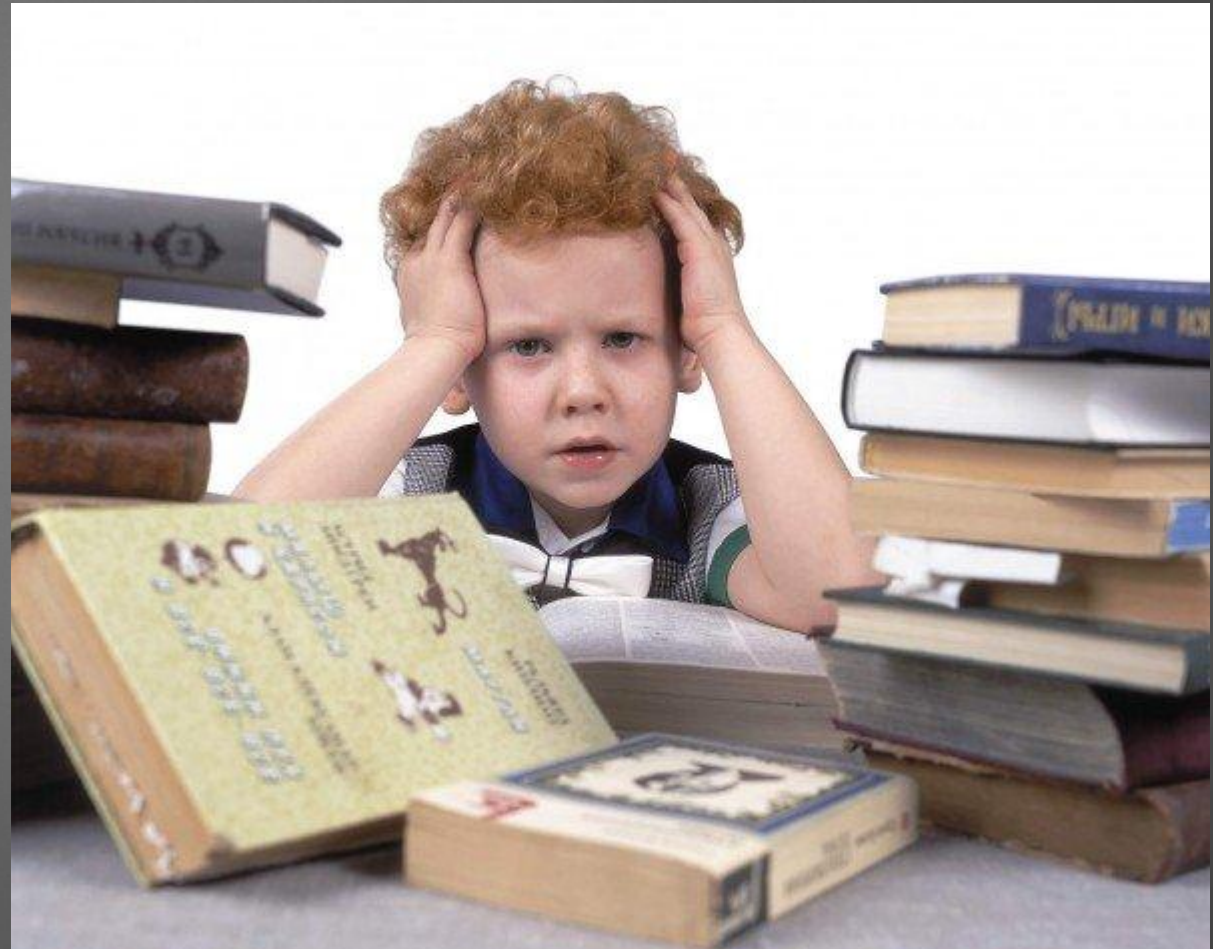

- To have no time for hobbies

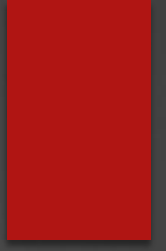

- To get up early in the morning every day

- To be tired of doing homework

Thank you for attention!
