Forest recreation

Environmentally safe production engineering

COMPANY PROFILE

«SOKOLOVOLES» integrated forest enterprise is one of Altai Krai forest industry insiders; it performs full range of operations connected with forest: from timber harvesting, forest recreation and forest protection to integrated cut timber processing. Our company is working to improve its wood conversion technology, carrying out operations in domestic and foreign markets.

Currently the company conducts activities in the territory of 24,000 hectares, harvesting more than 90,000 m³ of wood resources from improvement thinning annually. In the course of business activity we focus on manufacturing of high-quality products with up-to-date equipment with the use of high technologies. Due to enterprise modernization we process converted wood using in-house facilities, supplying the market with a wide range of industrial wood and construction materials. «SOKOLOVOLES» integrated forest enterprise is one of the district town-forming employers, its staff amounts to 170 employees.
