A New Idea in Mobiles by Emile Dobrovolskyi

Mobile industries development

Mobile phone business is one of the most quick growing industries. Not so long ago, the popular phone was Nokia 3310 with simple basic functions: call, text messaging and the only game — snake. However, great improvement has been made since then.

Sigma X-treme R2B7

Now I am proud to present the latest **SigmaPhone**© invention — Sigma X-treme R2B7.

This is a phone for people with active lifestyle. I bet even James Bond would love to have one!

It can help you in different risky situations!

Let's see some of its basic features!

Battery Never Goes Dead

What makes **Sigma X-treme R2B7** unique, is that parts of the phone are made from a thin solar skin to charge the battery when it's exposed to any kind of light! It can also use your own kinetic energy to recharge the battery. This means that when there is no sun or electricity available, you just need to shake the phone to recharge the battery!

Works Underwater

This phone is completely waterproof! You don't need to worry if it is raining outside.

You can answer calls while you are taking a shower!

You can even make a selfie underwater!

Medical Features

If you don't feel well, Sigma X-treme R2B7 can measure your pulse and blood pressure in one click. It can even do electrocardiography of your heart and with the help of a special App it can get hold of your personal doctor to get an advice.

X-Ray Feature

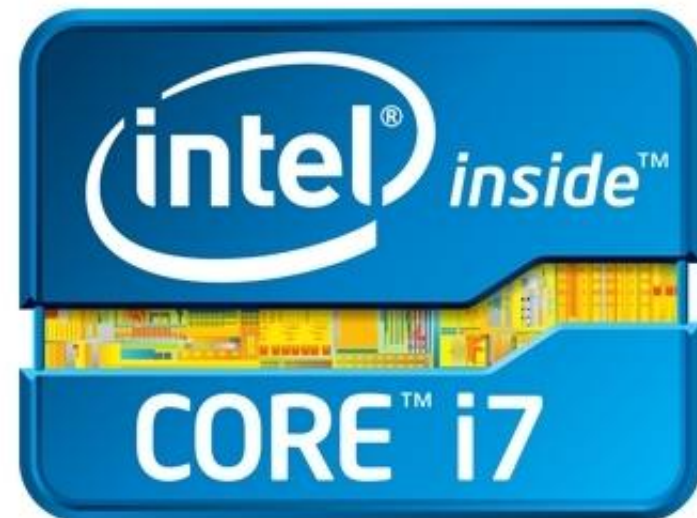

Don't worry if you broke some of your bones! Even then your phone can help you, because it has got a built-in x-ray feature!

Portable Computer

Sigma X-treme R2B7 has got a portable computer with projection laser keyboard.

You can get access to your favourite social networking sites, media, music, news, e-mails as fast as you would do with the help of you home computer.

Don't Hesitate to Buy

Are you willing to buy this futuristic mobile phone with 2020 technology? It is expected to be out in market soon. For more detailed information please visit our site:
