## Откройте для себя мир виртуальных путешествий!

Используйте ресурсы программы Skype в классе для проведения Skype-сессий с классами в других регионах и странах. [Подробнее >](#)

Мы предлагаем четыре способа применения Skype в учебных целях:

Skype-уроки

Узнайте больше о конкретном предмете или теме или сотрудничайте с классами по всему миру.

Mystery Skype

Играйте в Mystery Skype с другими классами.

Виртуальные путешествия

Отправляйтесь в увлекательное путешествие не покидая классной комнаты.

Приглашенный лектор

Приглашенные лекторы - эксперты самых разных областей знаний, готовые поделиться ими с вашими учениками.

### Empatico Activities

#### Get to Know You

Get to know your partner classroom by asking fun questions and sharing about yourself and your community.

**Subject:** Social Studies

[View Activity Plan](#)

#### Ways We Play

Discover everyone's favorite way to play. Read a story about imaginative play and discuss similarities and differences in play across communities.

**Subject:** Literacy, Social Studies

[View Activity Plan](#)

#### Community Cartographers

Identify key features and create a simple map of your school's surroundings. Then prepare to

#### Helping Hands

Explore how students in different places take on responsibilities at home and contribute to their communities.

Культурное многообразие

# 5 причина – это боль...

**Where to Get Maps**

Good maps are in general extraordinarily easy to obtain. Even the small-scale maps distributed free by gas stations are generally pretty good. National maps, particularly those government publications, are expensive in the extreme. For instance, most suppliers will furnish upon request the detailed lines of exactly what they have available.

Maps of those portions of the United States from the U. S. Geological Survey may be secured upon request the U. S. Geological Survey, Washington, D. C. For maps of areas near the Atlantic, Federal Census, Denver, Colorado.

For maps of national forest areas, write the Forest Service, Department of Agriculture, Washington, D. C. Maps of the Great Lakes and Lake Survey, Federal Building, Detroit, Michigan and public affairs located in the various government offices from the Commerce, Travel Bureau in Chicago and from the Map Distribution Office, Department of Mines and Technical Surveys, which is also located in Ottawa, Ontario.

For governmental maps of Mexico, write: Dirección de Geografía e Hidrografía, Secretaría de Fomento, P. O. Box 100, Mexico City, Mexico. Two private sources for foreign maps are: The National Geographical Society, International Map Company, Washington, D. C., and the International Map Company, 30 West 40th Street, New York, N. Y.

**Why consult Maps and Publications**

Current maps are by far the most valuable for wilderness use, indicating as they do valleys, canyons, mountains, and other such geographical features in terms of elevations. Consulting such

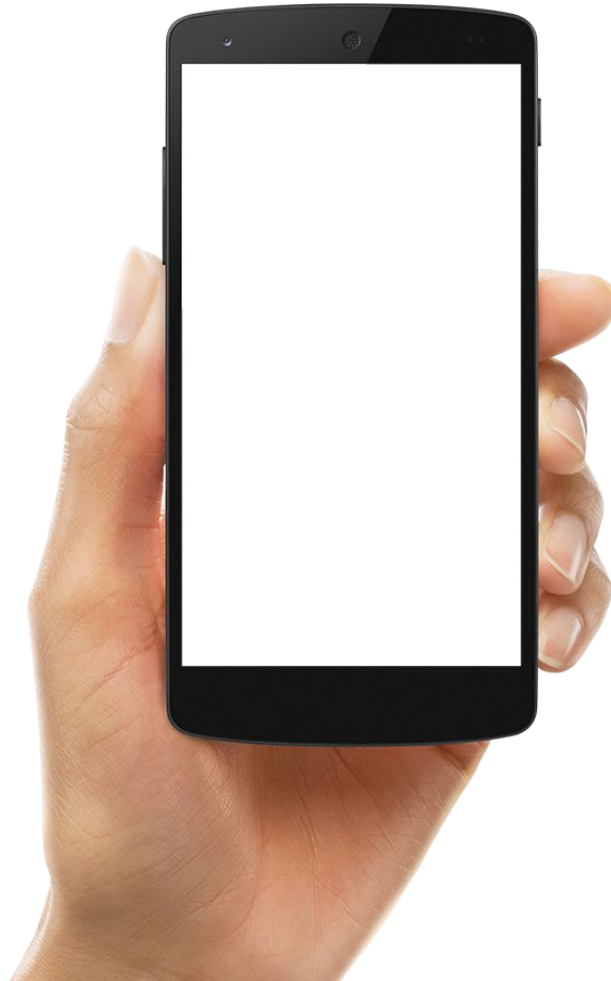

maps in strange country can save one an exhausting amount of unnecessary climbing, descending, and then scaling again. Finding by compass in a straight line, even over public, is often not advisable. In mountainous or wooded areas, for example, we soon learn that on more than one occasion both time and strength can be conserved by circling several miles along an open ridge instead of striking a small fraction of the distance straight across a deep ravine to the one destination.
