# Profile Page Design

## Profile Page Fields

Below is a list of fields required on the profile page. The same profile design should be applicable for both users and companies, in other words the components used should be shared for the fields that are similar or the same and new components used for any additional fields that user has but company doesn't (so they can easily be appended in the same view)

### User Profile Page Fields

- Email
- First Name
- Last Name
- Country/City Location
- Github Enabled Boolean flag
- Payment enabled flag
- Active/Inactive flag
- Profile (description of user details)
- Hourly Rate
- List of skills (java, html etc.)
  
- Experiences:
  - Institution (uni or work)
  - Role (degree or job role)
  - Description
  - Start date, end date

### Company Profile Page Fields

- Email
- Company Name
- Country/City Location
- Github Enabled Boolean flag
- Payment enabled flag
- Active/Inactive flag
- Profile (description of user details)

### Full Stack Software Engineer (SQL | Python | React)

Hourly - Posted 14 minutes ago

<b>30+ hrs/week</b> Hours needed	<b>3 to 6 months</b> Duration	<b>\$\$</b> Intermediate level
-------------------------------------	----------------------------------	-----------------------------------

You are a young, hungry full-stack engineer who wants broad exposure to a startup. Maybe you have plans to start your own company one day. This role will be an opportunity for you to grow in many ways.

You'll touch production code from day 1. You'll interact and engage with customers to understand their problems and needs, including execs at our client companies.

You'll work with product, sales...

## Feature Page

Parts to be ignored:

1. Linked Issues section
2. Eye in the top right
3. Attachments section
4. In the description it can be text Only, no need for code format.
5. Ignore the development section on The right side
6. Buttons under the title (attachments, Link, elipses can all be skipped)

The screenshot shows a GitHub pull request interface. At the top, the title is "Transactional email sent for password reset request" with a status of "Dev Review". Below the title are icons for attachments, a link, and a menu. The description states: "When a user submits a password request online, an email is automatically sent to the address tied to the user's account." A code block follows, showing a snippet of JavaScript code for a React component. Below the code is the "Linked issues" section, which includes a link to "PS-1 Identify email marketing platform with transactional email capabilities" marked as "DONE". The "Subtasks" section lists "PS-7 Test that the email fires instantly after request" and "PS-6 Draft transactional email copy", both marked as "OPEN". The "Attachments" section shows a document named "e specs - ds.docx" and a video player. The "Activity" section shows a conversation between Alana Grant, Cassie Owens, and Ryan Lee. On the right side, the "Status" is "Dev Review", the "Assignee" is "Ryan Lee", and the "Reporter" is "Alana Grant". The "Development" section shows "8 commits" and "1 pull request" which is "MERGED".

## Task Page

Parts to be ignored:

1. Eye in the top right

Parts to be changed:

1. Where the development section is popped out, include that below  
The reporter section on the right  
Side.

The screenshot shows a Jira task page for 'MA20 Sprint 7' with the task title 'Build Android application package'. The task is in 'In Review' status, assigned to Blair Bell, and reported by Rahul Ramsey. The activity log shows two comments from Blair Bell on November 7, 2018. A development summary popup is open, showing 1 branch, 10 commits (2 hours ago), 1 pull request (CLOSED), and 2 builds (both successful). The releases section shows 'Production' and 'Deployment Feature Flag 1' (ON).

## Project Pills SideBar

This should be implemented as a selectable Sidebar pill where each selection triggers A page change on the right side. This does Not need an actual page change but should Be editable to contain it. You can use bootstrap Pills for this.
