

COMMENT 1

Text around head of god is right now:

Helios · Ἥλιος · Хелиос

We would like to remove the text on the right in red and leave only the two words.....and capitalize them

ἭΛΙΟΣ · HELIVS

Please don't forget the " on the word ἭΛΙΟΣ and on the latin word HELIUS its now HELIVS (U is now V)

Try to make it work in the area...

If you need to make it wider to accommodate for the capital letters please do so....

COMMENT 2

Current text at the bottom in Latin is:

INSTITUTUM MACEDONUM

Please don't forget (U is now V)...so you need to change it to:

INSTITVTVM MACEDONVM

Sorry for this last change but someone was pushing....

COMMENT 3

Comment in red....

The whole middle composition of logo can go down a bit ...to equalize top and bottom red

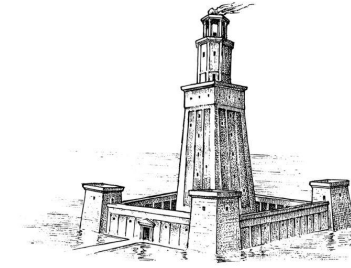

Comment in green....

Probably when you move the logo down the oak wreaths will equal out evenly in the whole middle space of the logo ... if not try to make sure they are as equal as possible

Last Comment in blue(if you can pull it off)

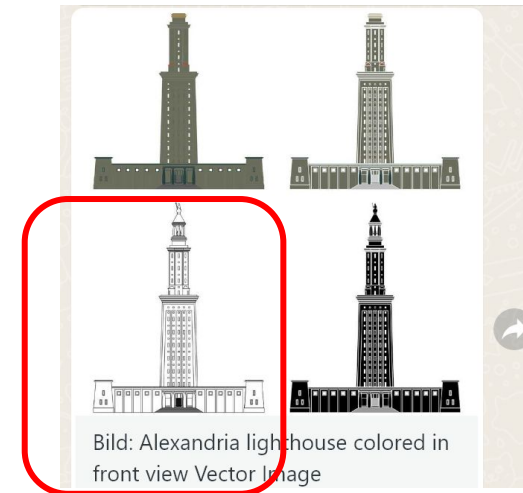

Currently each oak wreath (left or right) has 14 leaves)...can you make it 12 on both sides? And make it work? I would be thankful

COMMENT 4

Can you change this 3D logo with the following vector 2D logos below – my preference is the one circled in red....here is the link to find them online

<https://images.app.goo.gl/kHu7hz3ntvHreQ8n8>

Lighthouse needs to be in the same color as the rest of the logo (in this case thyre-purple)

COMMENT 5

After you make all changes

In order to judge if the logo is finished please send me again different variations of the logo in different colors, textures and views

I will confirm if we are now complete and close off the project

Or we need some last small changes

BUT THE WAY ITS GOING NOW – VERRY HAPPY TO SEE THE VISION COME TO LIFE

THANKS FOR THIS
