Original graphic for inspiration

Extend your RMM into network infrastructure
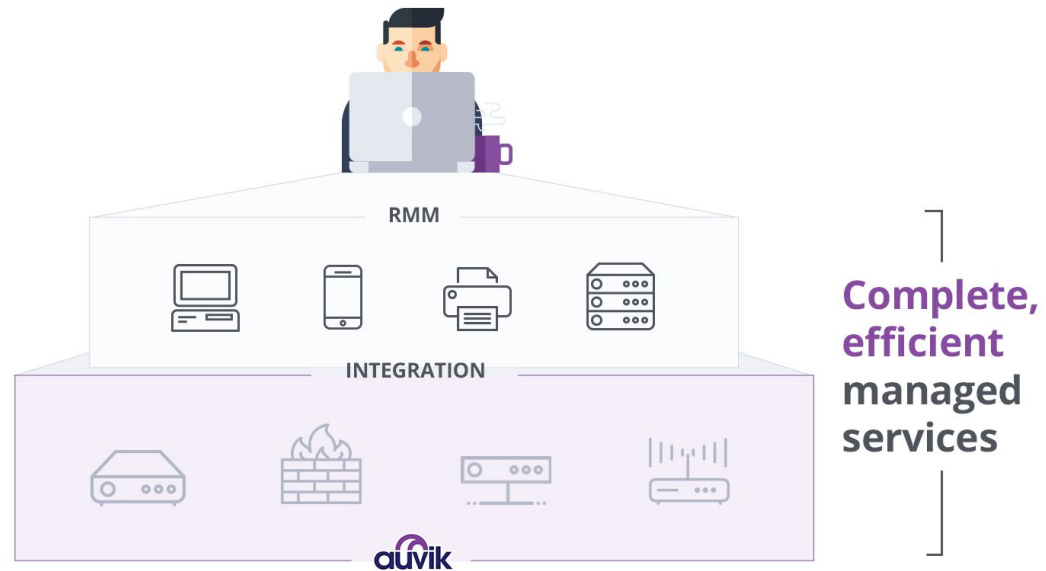

RMM

INTEGRATION

auvik

**Complete,
efficient
managed
services**

Deliver fully on client expectations by actively managing network infrastructure, in addition to servers and endpoints.

Build out existing service capabilities with smooth integration to remote monitoring and management (RMM) tools you already use.

Rocket your team's efficiency by automating time-consuming network infrastructure management tasks.

Requirements

Extend your RMM into network infrastructure

Design a persona

IT guy that looks like a Ninja with bandana
**Computer with a "ninja-star" logo???**

5 icons set 1
User, Workstation, Server, Network Device, Cloud
See next page for example

RMM

INTEGRATION

Complete, efficient managed services

5 icons set 2
See next page for example
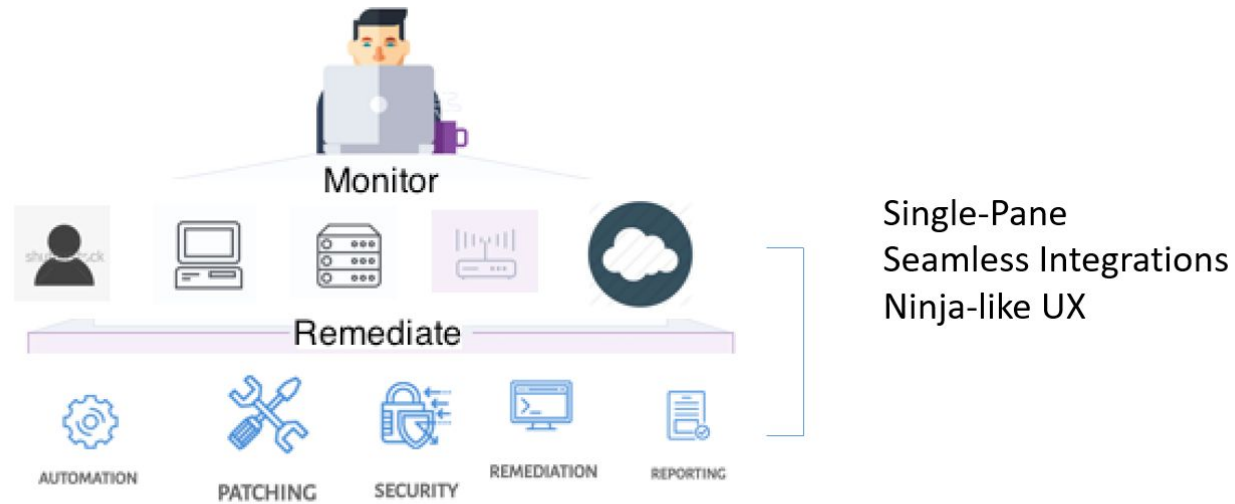

auvik

Colors have to match website

Deliver fully on client expectations by actively managing network infrastructure, in addition to servers and endpoints.

Build out existing service capabilities with smooth integration to remote monitoring and management (RMM) tools you already use.

Rocket your team's efficiency by automating time-consuming network infrastructure management tasks.

Example

Streamline IT management with your business objectives.
(and spend less time managing it)

Monitor

Remediate

AUTOMATION   PATCHING   SECURITY   REMEDIATION   REPORTING

Single-Pane
Seamless Integrations
Ninja-like UX

Reduce Downtime
Remediate IT problems
before your users come to
you.

Enforce IT Compliance
Protect your business
through fully managed
patching, antivirus, and
backups.

Rocket Team Efficiency
Automate time-consuming
maintenance tasks and
systems deployment

Notes

- Main website is www.ninjarmm.com (however this is currently going through a re-design)

- Some current icons for reference: https://ninjarmm.com/landing

- You don't have to use this.

- I prefer a flatter look. (google material design)
