

Wonders of the World

Brazil is a special city. It differs from the rest of the centers of the South American country's first modern architectural sights.

One of the architectural sights is Cathedral of Brasília. It was designed by the greatest architect Oscar Niemeyer.

Cathedral of Brasília was built during 10 years. It was officially opened on May 31, 1970.

Cathedral of Brasília is a structure with a height of 40 meters. Diameter of its base is 60 meters. A distinctive feature of the building is support structures. They are curved columns, which resemble shape of two hands, directing to the sky.

Near the entrance of Cathedral of Brasília the visitors can see four bronze sculptures, which height is 3 meters. This sculptures represent evangelists. They were created by the famous sculptor Dante Croce in 1968.

Inside the cathedral over the nave are sculptures of three angels, suspended by steel cables. In 1988 Oscar Niemeyer got a prestigious award for the project of this masterpiece.
