Web page

From Wikipedia, the free encyclopedia
(Redirected from [Web Page](#))

A **web page** or **webpage** is a [document](#) or information resource that is suitable for the [World Wide Web](#) and can be accessed through a [web browser](#) and displayed on a [monitor](#) or [mobile device](#). This information is usually in [HTML](#) or [XHTML](#) format, and may provide [navigation](#) to other web pages via [hypertext links](#). Web pages frequently subsume other resources such as [style sheets](#), [scripts](#) and [images](#) into their final presentation.

Web pages may be retrieved from a local computer or from a remote [web server](#). The web server may restrict access only to a private network, e.g. a corporate [intranet](#), or it may publish pages on the World Wide Web. Web pages are requested and served from [web servers](#) using [Hypertext Transfer Protocol \(HTTP\)](#).

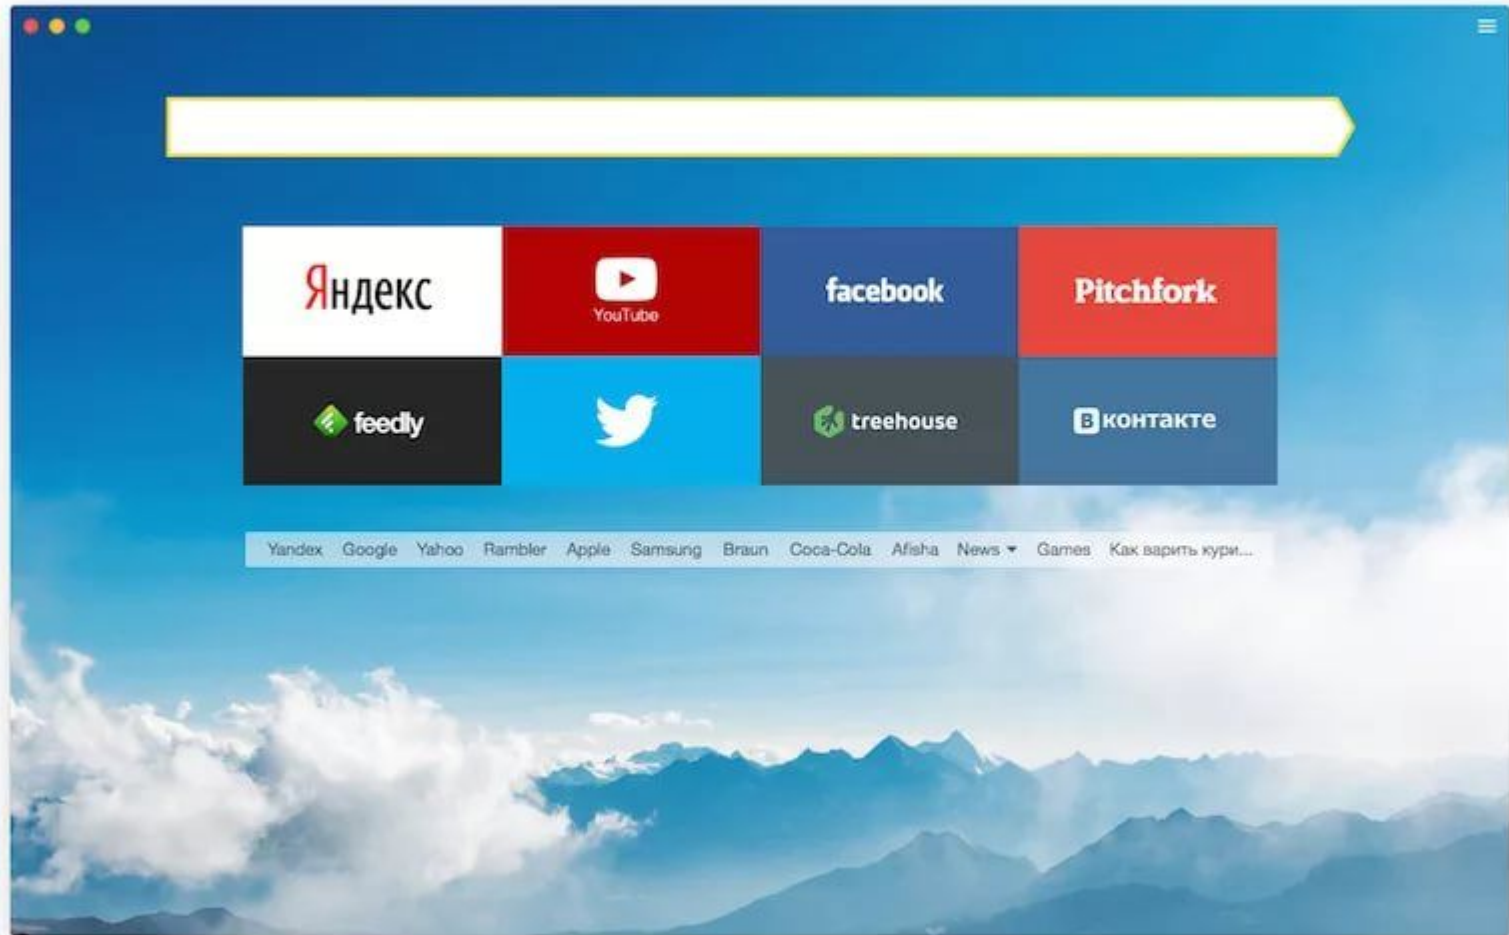

Web pages may consist of files of static text and other [content](#) stored within the [web server's](#) file system ([static web pages](#)), or may be constructed by [server-side](#) software when they are requested ([dynamic web pages](#)). [Client-side](#) scripting can make web pages more responsive to user input once on the client browser.
